Committed to bring Health for All

One of the largest not-for-profit associations in the Health Care Sector in the world
More than 70 years of service
Over 3500 Member Institutions
Caring for 21 million people every year

Master Human Resource
Special Consultative Status with the Economic and Social Council (ECOSOC) of UN
Member of many International and National bodies
Palliative-cum-Hospice Care Centres
CHAI through its member institutions (MIs) are providing palliative care services to people with HIV/AIDS and also people with other chronic health conditions such as cancer, paralysis, alzheimer’s, stroke, heart and kidney diseases by providing medical, nutritional, psychological and long-term support.

The estimated cost for a 10-bedded Centre for a year: ₹ 12 lakhs

Holistic Care Centres for People Living with HIV/AIDS (PLHIV)
The project is meant to support and capacitate 90 Holistic Care Centres to render committed care services to people living with HIV/AIDS. CHAI has been working in the field of HIV/AIDS since 1993. At a given point of time, each centre takes care of 15-20 PLHIV.

The estimated cost for a 15-bedded Centre per year: ₹ 20 lakhs

Special Care Homes for Children and Adolescents with HIV/AIDS
Through the project, CHAI would like to support 2000 children infected and affected with HIV/AIDS through 25 Special Care Homes and raise them as responsible citizens, by providing comprehensive education, nutrition and health care.

The estimated cost per institution: ₹ 1.2 lakhs per month

Health Care Services to Rural & Tribal People through Telemedicine Centres
In India, most of the rural areas suffer from lack of quality healthcare and the availability of good doctors. Hence, CHAI proposes to strengthen service delivery through Rural Health Care Centres by effectively linking them to expert doctors, who will provide off-site consultation through telemedicine technology.

Estimated cost to connect 10 Centres (with one doctor): ₹ 10 lakhs [₹ 1 lakh per centre]

Disability Centres for Holistic Development of Children with Disabilities
Currently CHAI is reaching out to 20,000 poor and marginalized children with disabilities across India. Most of these children live in far-flung areas. CHAI intends to reach out to these children through 300 centres to provide them with regular therapy, daily living skills, vocational education and medical care through institutional and community care approaches.

One time support towards purchase of equipment for rehabilitation of children per Centre: ₹ 3 lakhs

Low-cost Diagnostic Devices for Community Health Service
CHAI network has 2252 health centres, serving marginalized people. In order to equip and reposition them as ‘Community Health Centres,’ these centres will require a portable kit consisting of a few low-cost diagnostic devices such as thermometer, blood pressure monitors, glucometer, pulse oxymeter, weighing machine for children and haemoglobin-testing device.

The estimated cost per kit: ₹ 15,000

Free Dialysis for Poor Patients
About eight lakh people in India suffer from kidney diseases. Ninety per cent of them are not able to afford dialysis on a long-term basis due to the cost, time and logistic factors. CHAI would like to organize free/subsidized dialysis service to poor patients who cannot bear the cost, through its member institutions.

Estimated expenditure for 1000 patients (at a subsidized rate of ₹ 800 per dialysis): ₹ 8 lakhs

Installing Solar Power Systems in Hospitals and Health Centres
Most of the hospitals and health centres run by member institutions of CHAI are located in the remote corners of the country and they face power cuts for more than 8 to 10 hours, affecting their proper functioning. CHAI plans to install solar power system in these health centres.

Estimated cost for 10kva, 5 kva and 2kva unit are: ₹ 16, 03,080/-, ₹ 8, 01,540/- & ₹ 3, 67,640/- respectively.

Tuberculosis Patient Nutrition Fund
For those who suffer from ‘Tuberculosis,’ inadequate nutrition is one factor that affects their speedy recovery. CHAI would like to provide these poor deserving patients with a nutrition kit comprising dal, sugar, groundnuts, protein powder, tonic and biscuits etc.

Nutrition cost for a patient for 6 months: ₹ 5000

CHAI seeks your support in realizing these needs of the people
