### **\*Hearing Aids\***

Identifying hearing loss at a very early age is important because children with hearing loss often fall behind their peers in speech and language development, cognitive skills and social skills. If the hearing loss isn't treated these deficits can lead to adult issues such as reduced socioeconomic status, poor socialization skills, depression, etc. Obviously,

the earlier hearing loss can be detected the sooner treatment can begin and have better outcomes for that individual.

Children under the age of 21 can request funding for hearing aids under the EPSDT program and those on a waiver (CCC+ or DD) 21 and over can request them under waiver AT services. A hearing evaluation from your Audiologist is mandatory and an estimate from the hearing aid dispenser needs to be submitted.

**The cost if you had to pay for this device can be, \$3000.00 or more (depending on combination of accessories). Ability Unlimited may be able to get you this device through Medicaid.**
