	<p>Augmentative/ Alternative Communication</p> <p>iPad equipped with a speech or learning apps like the ones listed below. You CAN get multiple apps that will fit your loved ones needs!</p> <p>*You may want to consider a case as well!</p>	<p>\$329</p> <p>\$15</p>
	<p>Augmentative/ Alternative Communication</p> <p>Proloquo2Go is an award-winning symbol-supported communication app. It provides a voice to over 150,000 individuals who cannot speak. The app is designed to promote language development and grow communication skills. Its innovative features support users, parents, teachers and therapists to quickly personalize the vocabulary and settings.</p> <p>Proloquo2Go is used by people with autism, down syndrome, cerebral palsy and other diagnoses. It is available in English, Spanish and French, including regional and bilingual support.</p>	<p>\$249</p>
	<p>Augmentative/ Alternative Communication</p> <p>Mountain Precision NuVois III Digital is an electro-larynge speech aid with state of the art electronics. A programmable electronic circuit allows for full digital control of all functions. The unit features volume and tone or pitch buttons for easy adjustability, allowing the user to add inflection to their speaking voice for emphasis and a more natural sounding voice. This model uses less current draw for longer lasting batteries.</p>	<p>\$529.99</p>
	<p>Augmentative/ Alternative Communication</p> <p>TouchChat HD is a full-featured communication solution for individuals who have difficulty using their natural voice. TouchChat is designed for individuals with Autism, Down Syndrome, ALS, apraxia, stroke, or other conditions that affect a person's ability to use natural speech.</p>	<p>\$149.99</p>

	Augmentative/ Alternative Communication	Avaz, a full-featured AAC app , has been developed for children who are non-verbal or who have difficulty speaking. Avaz has been designed with the vision of making every voice heard! Avaz is child- and caregiver-friendly, and helps therapists and educators to bring out the maximum potential in children. Avaz has received top international awards, including being on MIT's list of Top 35 Innovations in 2011.	\$199.99
	Augmentative/ Alternative Communication	iCommunicate for iPad allows you to create pictures, flashcards, storyboards, routines, visual schedules and record custom audio in any language. Aside from being an AAC device iCommunicate also includes task completion and audio visual prompting. iCommunicate comes preloaded with 10,000 symbolstix pictures. You also have the ability to insert Google images and the story boards are printable. One negative is that this app is for the iPad only. The feature set is definitely not as robust as Proloque2Go, but you get what you pay for.	\$49.99
	Augmentative/ Alternative Communication	Voice4u , is a revolutionary AAC (augmentative and alternative communication) application that helps individuals to express their feeling, thought, actions and things they need. It is a perfect solution for learning and communication for autistic individuals and people around them. With it, you will never have to guess at an individuals' wants and needs and will break down the barriers of communication for individuals with special needs. Two complaints about Voice4U are that the illustrations are not the best and that you are limited to 9 categories.	\$59.99

Use it to view presentations, paperwork, even work on crafts. Acrobat HD ultra is ideal for work or home.</p>	<p>\$2295</p>

Visual Aid

With HIMS Lifestyle HD Desktop Video Magnifier 24", users may be able to read at a smaller size due to its sharper image, thus seeing a wider field of text with more letters or words displayed across the line requiring less movement of the X/Y reading table. The lower magnification level allows a wider field view of photos and the natural color image shows more definition and detail.

Easy to use with simple front panel design. Power, Magnification and Image buttons are all located on the front panel. A single Power button, powers on the unit. Magnification buttons are large and ergonomic push buttons. To increase/decrease the magnification, simply press the Up or Down arrow buttons. Zooms continuously (not to a limited preset number of magnification levels.) To select or change the Image mode, press the large Left or Right arrow buttons to view the different Modes. Color, Enhanced Reverse Image (white letters on a black background), enhanced B/W, normal B/W, or the most commonly used monochrome images like yellow text on a black background, yellow text on a blue background or green text on a black background.
