And Related Matter.

APPLICATION 18-07-011

(Application 18-07-011 (Filed July 13, 2018)

ASSIGNED COMMISSIONER’S SCOPING MEMO AND RULING

This scoping memo and ruling sets forth the category, issues to be addressed, and schedule of the proceeding pursuant to Public Utilities (Pub. Util.) Code § 1701.1 and Article 7 of the Commission’s Rules of Practice and Procedure.

Procedural Background

These related applications were filed on July 13, 2018. They arise from the same underlying transaction, a proposed merger between Sprint Communications Company, L.P. and T-Mobile, USA Inc., two of the four largest national wireless service providers. The applications were protested by the Commission’s Public Advocate’s Office, The Utility Reform Network, and the Greenlining Institute. On September 11, 2018 the assigned Administrative Law Judge (ALJ) issued a ruling consolidating the proceedings. A prehearing
conference was held on September 13, 2018 to discuss the issues of law and fact and determine the need for hearing and schedule for resolving the matter. After considering the applications and protests and discussion at the prehearing conference, I have determined the issues and schedule of the proceeding to be as set forth in this scoping memo.

**Issues**

The fundamental issue presented by these applications is whether the proposed merger of two of the four largest national wireless service providers is in the public interest of the residents of California. This is the standard historically employed by the Commission to evaluate proposed transactions involving public utilities subject to its jurisdiction. A determination of the public interest requires a consideration of significant factors implicit in the proposed transaction. Below I list some of the factors that the Commission will consider in making a public interest determination regarding the effects of the proposed merger on the residents of California.

1. Would the merger result in reduced competition in any metropolitan area or other geographically distinct market for wireless services?
2. What are the relevant markets?
3. Would the merger give the merged company monopsony power or increase the tendency to monopsony power including market power over equipment suppliers?
4. What merger-specific and verifiable efficiencies would be realized by the merger?
5. Would the merger promote or constrain innovation?
6. How would the merger affect the market for special access services?
7. How would the merger affect the market for special access backhaul services?

8. How would the merger affect the ability of independent competitive wireless carriers to obtain backhaul services?

9. Would the merger increase the market power of the incumbent local exchange carriers and their wireless affiliates?

10. Would the merger maintain or improve the quality of service to California consumers?

11. What California utilities would operate the merged properties in the state?

12. Would the merger preserve the jurisdiction of the Commission to effectively regulate those utilities and their operations in California?

13. Would the benefits of the merger likely exceed its detrimental effects?

14. Should the Commission impose conditions or mitigation measures to prevent significant adverse consequences and, if so, what should those conditions or measures be?

**Need for Evidentiary Hearing**

Obtaining satisfactory answers to the above questions will require consideration of multiple factual issues. These include, but are necessarily limited to, issues related to innovation, service quality, customer satisfaction, pricing policies, pre-paid services, wholesale markets, the roll-out of 5G services (particularly in rural markets), system integration, device compatibility, customer migration, net neutrality, customer privacy and mandatory arbitration clauses. Accordingly, evidentiary hearing is needed on these issues.
Schedule

The following schedule is adopted here and may be modified by the ALJ as required to promote the efficient and fair resolution of the consolidated proceeding.
