

My experience at the Kappa League National Conference was very enjoyable. I enjoyed being able to spend time with the Kappa Leaguers from my chapter as well as meeting new Kappa Leaguers. I think it is great that we are able to connect and interact with other black young men. The sessions were very interactive and informative to me. For example, the breakout session about Naviance was very good to me. It showed me how to prepare for my future and the idea that I need to work hard now to prosper later. One thing that I will remember is that just by being at the National Conference we are apart of the talented 10th. Just hearing this has made me more inspired to work harder so I would be worthy of this title. This means a lot to me because I want to be a future leader and the conference only reinforced this idea. Also another thing that I will take with me is that people spend money they don't have on things they don't need to impress people they don't like. This quote means a lot to me because I feel like it is very true and is something I should live by. I feel like it's important because nowadays everyone is so consumed with the idea of having to impress everyone for no reason and I think it's important to teach people that they shouldn't focus on such shallow things. To close, I believe that the conference was very great because of the way it allowed all of us to connect. Additionally I really enjoyed all the lessons the brothers taught us and I would like to say thank you.
