

Mobile Pharmacy Apps

RxManifest™

A Mobile Delivery Solution for Pharmacies

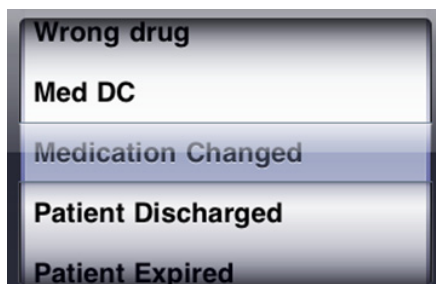

RxManifest is a pharmacy delivery app that is designed to increase the productivity of your pharmacy delivery process. Because it is fully integrated with the Helix Pharmacy System, workflow will remain easy and efficient. The app is used with a lightweight bar code scanner combined with either an iPhone® or iPod® touch that electronically records the signature at the point of delivery.

RxManifest saves time, for the driver during the pharmacy check in and out steps, and at the point of delivery.

Features

- Wirelessly scan delivery totes / packages out for delivery.
- One Scan for all totes / packages at the point delivery.
- Exception handling for specific prescription orders.
- Electronically capture the signature at the point of delivery.
- Auto check-in of delivery events upon returning to the pharmacy.
- Automatically updates Helix Pharmacy System's workflow.

Increase Productivity

At the Pharmacy

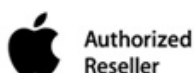

Only one scan is required to check out totes for delivery from the pharmacy. The Auto-Check In feature enables the driver to automatically update all deliveries in the Helix Pharmacy System and then auto reset the device for the next delivery.

Point of Delivery

Reduce time with one scan only for delivery of one or all totes or scan using the barcode on the Rx package. Quickly change the delivery status of the Rx and provide reasons for a refused Rx.

Auditing Process

Effortlessly produce audits reports and reduce the hassle during audits with a fully searchable delivery RxManifest App. Also, print delivery manifest with the printable electronic signature capture.

Mobile Pharmacy Apps

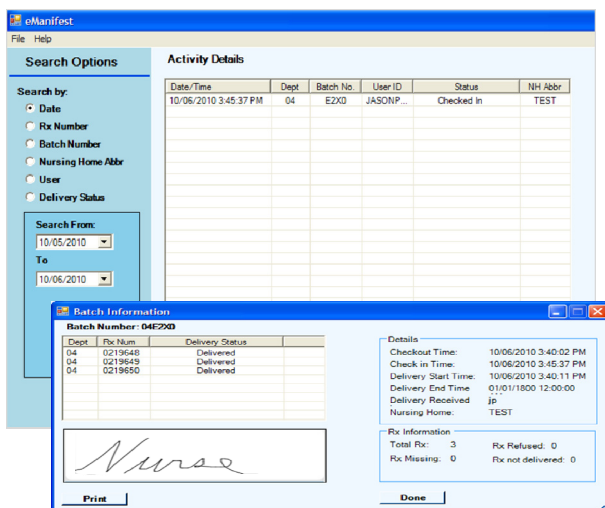

RxManifest™

A Mobile Delivery Solution for Pharmacies

Technology, The App is on the iPod or iPhone with an external and easy-to-use barcode scanner. It is distributed via Apple iTunes and all updates are pushed to the device directly to simplify the update process. RxManifest is easy to integrate into your network environments with two options for connectivity: support for Wi-Fi 802.11 a/b/g/n wireless networks or 3G cellular connectivity.

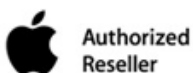

Full Integration with the Helix Pharmacy System

RxManifest is fully integrated with the Helix Pharmacy system workflow. Helix Rx Tracking records are automatically updated in Helix to complete the workflow process. There is a full searchable database with automatic updates from the device. Easily search and generate audits reports with actual electronic signature attach.

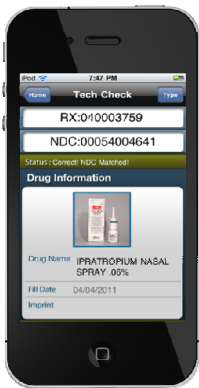

For more Information about our Pharmacy Apps or the Helix Pharmacy System please call 800-762-9378.
