

Wild Aware Utah Activity: Match the antlers, tracks and scat to the correct elk, mule deer or moose.

Moose are the largest member of the deer family found in Utah, mule deer are the smallest.

Tips to avoid conflicts with these Utah deer species:

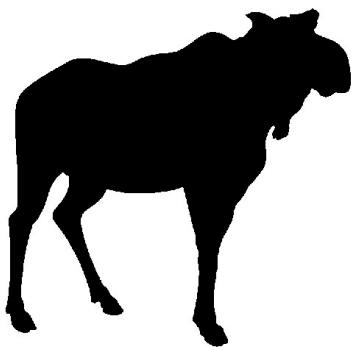

- Do not approach or feed wild animals.
- Watch wildlife from a distance. Always give the animal a lot of room to get away from you.
- When driving in the mornings and evenings, ask your parents to slow down and pay attention to wildlife crossing signs. Help the driver look out for deer crossing the road.
- If you find a fawn or calf, leave it alone. The mother is usually close by and will protect her young.
