- We are a free, money-less organization with a focus on capability-building social service in our community. We believe in *people helping people*.
- We build capability in people struggling with life (the poor, in recovery, unemployed, young & old) AND the volunteers AND the organizations serving them. We have tools for volunteers, mentor program leaders, volunteer leaders and non-profit executives.
- Your service experience will be richer because of your participation with the Network. You become a “skill builder” AND the organization you support becomes stronger.
