Why look "loving hands at home" when you can easily look "custom couture"?

Nothing is more frustrating! Gorgeous fabric, a stunning pattern choice, meticulous workmanship and a finished garment that makes you look and feel frumpy.

A seminar with Nancy Nix-Rice can teach you to know (before you sew) exactly which styles, fabrics and details will make you look and feel like a million.

Each participant will learn:

- How "points of connection" make any woman look and feel beautiful.
- How to identify her personal key neutral. (Clue: it's *probably* NOT black!)
- How to classify her coloring as warm, cool, or something in-between.
- Accent colors that make her look glowing and healthy.
- Four body classification and key styles to flatter each unique figure type.
- Solutions to banish the eight common figure challenges.
- The (almost) universal secret to looking instantly taller, thinner and more proportional.
- Eight strategies to appear ten pounds thinner without losing an ounce.
- Undercover secrets to strip away years and pounds.
- Fine points of fit to make her clothes look more expensive.
- How to balance her facial shape to an ideal oval.
- How facial structure dictates design details and accessory shapes.
- Accessory selection: the ideal shoes, belts and handbags to finish a look.
- The magic of accessory "links" to multiply mix-match wardrobe options.
- Purging her closet: deciding what goes and what stays.
- Surprising updates to give questionable garments new life.
- Ten organizing tricks to make her closet user-friendly.
- The four key pieces that can triple the versatility of her wardrobe.
- Six secrets to pain-free shopping, and much more...
