Subject: Asbestos Waste Processing

Mr. Nocito:

As we discussed at our meeting yesterday, if the generator of the asbestos containing waste operates (owns/rents) the ABCOV processing system, they will be able to operate under a residual waste permit-by-rule as a captive processing facility. See the following web-link for the permit-by-rule requirements.

<http://www.pacode.com/secure/data/025/chapter287/s287.102.html>

Disposal of the processed waste in a municipal waste landfill should not be problem. The generator should work through the landfill operator to obtain the necessary approval (Form U).

<http://164.156.71.80/WXOD.aspx?fs=7780d840f80b00008000038200000382&ft=1>

The beneficial use of the processed waste would require a general permit. See the following web-links to the residual waste general permitting requirements.
