Inspections/Automated Billing | Self Inspections | Emergency Response Cost Recovery | False Alarm Management  
HazMat Registration | EMS Transport Billing | EMS Subscription Program | ALS/BLS First Responder Support

**Full Inspection /  
Automated billing**

Combining technology with automation, we can greatly enhance your inspection and permitting program. You inspect (optionally on a tablet device), we do the rest, efficiently and quickly with full transparency. We follow up on payments, have 24/7 live data reporting and the highest recovery rate in the industry.

**Self Inspection  
Program**

This revolutionary program provides the ability to have base level inspections for ALL businesses. It satisfies your responsibility to assure your businesses are safe. In a rotation with the full inspection above, it provides the maximum ability to assure business compliance while supporting the costs of your inspection program. All with a flexible audit capability.

**Emergency Response  
Cost Recovery  
Program**

You incur significant costs responding to incidents. Appropriately recovering the costs of high impact events should be a standard for your fire department. It is becoming the new standard. Let us provide you with an estimate of your potential recovery.

**False Alarm  
Billing Program**

We pull direct from your CAD and track, notify, bill and recover your costs of response. With full transparency and accountability and 24/7 reporting.

**EMS Transport  
Billing Program**

With nearly 20 years experience and advanced technology, let Fire Recovery EMS perform for you. Our track record is impeccable, our recovery rates among the highest and our reporting is real time. Plus we handle all the headaches of collecting.

**ALS/BLS First  
Response Support  
Program**

There are real costs to responding to medical incidents. Medical insurance typically covers the cost of the EMS service while most first responders have had to absorb these enormous costs. Our First Responder Support Program allows you to track and bill to recover these costs. We bill, collect, and pass the revenue back to our departments monthly.

**EMS Subscription  
Program**

Our EMS Subscription Program is an "insurance policy" to help cover first responder fees for residents in your region. Combined with our First Responder Support Program, the EMS Subscription Program allows for affordable fees to cover a possible first responder event. For a small annual fee, a resident or business can pre-pay for any incident for their family or employees.

**HazMat Registration  
& Inspection Program**

**Search for:** Streamline Haz-Mat

Identifying and staying ahead of the threat of Hazardous Materials in your City is critical to fire prevention and public safety. Not knowing where threats exist is a real problem faced by all communities. Our HazMat program registers all hazardous chemicals, provides a technology solution to verify and confirm, reports all data back to the Fire RMS and or CAD system and has an integrated Accounting/Billing solution for long term program sustainability.
