Self Inspections

Fire Recovery's Self Inspection Program is revolutionary. For those of you who have inadequate manpower to perform all of your annual inspections, our Self Inspection Program handles the low-risk inspections for you instead. We process your list of low-risk inspections by contacting business owners and having them perform their own inspections. We provide all of the information; the businesses themselves provide the labor. You receive the detailed data for your records. You have satisfied your inspection obligations and have passed along a discounted inspection cost. It's a win-win for your department and the business community. Based upon your specifications, a random sampling of businesses is automatically generated for your department's follow-up and full inspection. An audit assures business compliance. Contact us today for more details on this revolutionary service.

Fire Recovery USA

Fire Recovery USA is the nation's largest cost recovery company for fire departments. We recover inspection, self-inspection and incident billing. The RecoveryHub, our proprietary cloud-based platform, allows your personnel to monitor all activity on your account and provides real-time reporting. Your team can manage today, not after the fact, as with most financial management platforms. Real-time information allows you to know exactly where you are in your cost recovery program. No one does it better than Fire Recovery USA.

Our Commitment

We consult and partner with each and every customer to ensure the success of our process and our systems. We strive to exceed your expectations, delivering the solutions you need with transparency you can trust.
