Accident/Incident Cost Recovery

Our incident billing system is a revolutionary cost recovery tool for Fire Departments. We have developed a proprietary software system that delivers the highest results in the industry for incident billing. We maximize your recovery and minimize your efforts. We even extract recovery items from your system and post them to your account for you to review and approve. And we provide immediate, real-time information for every incident with The RecoveryHub, our proprietary web-based management tool. You can review all activity, financial results and details of your recovery accounts, 24/7, in real time. Leave the details to us. You get funds. We do the work.

Fire Recovery USA

Fire Recovery USA is the nation's largest cost recovery company for emergency services. We recover your costs of incidents, false alarms, inspections, self inspections and subscription programs. The RecoveryHub, our proprietary cloud-based platform, allows your personnel to monitor all activity on your account and provides real-time reporting. Your team can manage

today, not after the fact, as with most financial management platforms. Real-time information allows you to know exactly where you are in your cost recovery program. No one does it better than Fire Recovery.

Integrates with numerous data and RMS systems

Our proprietary Recovery Link Software integrates seamlessly with numerous data and Records Management Systems to automatically transfer run data from your RMS to our Recovery Hub. Complete your incident reports as you do today, automatically upload the data to us, and let us provide the most effective, efficient and seamless full-service cost recovery available. We invoice, follow up, collect and issue your funds.

Simple. Efficient. Effective.
