# SUSTAINABLE FOOD SYSTEMS

FOR THE SECONDARY CLASSROOM\*

\* Open to all grade levels.

PDE3 Course: 3 Credits

June 15, 16, 19 & 20, 2017

## Course Description

*Instructor: Albie Miles, UHWO*

This 4-day course provides multidisciplinary analyses of the food and farming systems of Hawai'i. Through a combination of lecture, discussion and field experiences participants will examine the historical forces shaping food and agricultural systems in Hawai'i, the key socio-economic and ecological costs and benefits of the current agri-food system in Hawai'i.

Participants will explore elements of sustainable community food systems, experience local food systems professionals, and discuss and identify future directions for student involvement with food system study and change.

Participants will develop a Unit Study as part of their required Learning Results Portfolio.
