

DEF PRO-6000

HI-FLOW TRANSFER PUMP SKID SYSTEMS

VALUE-DRIVEN WITH AN EMPHASIS ON QUALITY

No one else in the industry does it quite like us. TECALEMIT's special projects team is dedicated to designing and engineering the best hi-flow transfer pump skid systems in the market.

TECALEMIT's DEF Pro-6000 systems are designed for bulk to tote, rail to bulk, or bulk dispensing. These systems are offered in various packages to meet specific flow rate ranges. They can be configured from simple packages, to more complex ones with Weights & Measures components or different power sources. Various add-on features are also available including meters, filters, hose reels, & 3-way bypasses.

The DEF Pro-6000 packages are robust solutions geared toward hi-flow applications.

TECHNICAL SPECIFICATIONS & FEATURES

40-60 GPM

48" x 48" powder coated skid

Stainless steel 1.5" 1HP pump

12' x 1.5" suction hose - Ball valve with SS camlock end

25' x 1.5" dispense hose - Ball valve with SS camlock end with Micro Matic fill head

Hose hanger

On/off switch

60-80 GPM

48" x 48" powder coated skid

Stainless steel 2" 2HP pump

12' x 2" suction hose - Ball valve with SS camlock end

25' x 2" dispense hose - Ball valve with SS camlock end with Micro Matic fill head

Hose hanger

On/off switch

80-120 GPM

48" x 48" powder coated skid

Stainless steel 2" 3HP pump

12' x 2" suction hose - Ball valve with SS camlock end

25' x 2" dispense hose - Ball valve with SS camlock end with Micro Matic fill head

Hose hanger

On/off switch

OPTIONAL UPGRADE FEATURES

FLOW METER

MX40P - 40-60 GPM
MX50P - 60+ GPM

DEF HOSE & HOSE REEL

50 ft. DEF hose reel
7520-25-26RT

FILTER

Stainless steel multi-cartridge filter housing and cartridge
7F0S3

3-WAY BYPASS

3-way bypass valve

W&M METER SETUP

Weights & Measures meter setup - Also available with electronic registration
