

TRUCK (BELLY) BOXES

EQUIPMENT STORAGE SOLUTIONS

ULTIMATE SPACE EFFICIENCY FOR EQUIPMENT HOUSING

CUSTOMER TRUCK NOT REQUIRED FOR BUILD!

TECALEMIT's line of custom equipment extends beyond hi-flow transfer dollies and skids. We also offer unique, space-efficient truck belly boxes designed with the customer in mind.

If you're familiar with fluid distribution transport trailers, you understand the necessity of having storage space underneath the truck frame that is easily accessible. The Truck Belly Box creates the perfect home for crucial pieces of equipment to reside during the jarring ride to and from deliveries.

Each Truck Belly Box is made to order and designed to meet your individual needs. Additionally, each system is assembled by our dedicated Projects team and skilled personnel.

TECALEMIT's custom, turn-key Truck Belly Boxes are available in a variety of sizes with endless optional features to meet your specific needs.
