

2017 Terragena Pinot Noir

Single Barrel: Pommard Clone aged in new Hungarian Oak

Excellent way to taste the expression of a pure Pommard clone wine with Medium plus toast Oak impact. Compare with the other wines in this special single barrel three wine series to experience the characteristics of the featured clones and the influence of oak in Pinot Noir production. All harvested on the same same date from the same vineyard and received comparable cellar treatment during production. Each barrel was selected based on winemaker's experience of typicity of clonal expression in coastal California. Details of each wine are handwritten on the labels below due to incredibly limited production.

pH: 3.3
TA: 7.1 g/L
Amount produced: 21 cases

About the Vineyard

This small family vineyard was planted in 1976.

From the Abbassi family:

Abbassi Vineyard's topography is Valley Floor sloping gently towards the southwest. The soil is huichica loam. Blessed with an ideal location in the Carneros, the grapes soak up the sun's warmth in the afternoon and are kissed by the cool foggy moisture that rolls in from the Bay in the evenings.

About the Winery

The Terragena Vineyard team, headed by winemaker and vineyard proprietor Chris Buchanan, crafts limited production wines with the same spirit of adventure that first led us to build our off-grid vineyard in Humboldt County. We are inspired by the ruggedly beautiful hills, forests, and meadows around us to create wine that expresses these characteristics of the land without any added fluff or distraction. *Terragena* is a latin word meaning "born of the earth." We are dedicated to sustainably expressing the unique characteristics of our estate vineyard as well as our diverse partner vineyards by nurturing the wine from the earth to the bottle.

GOVERNMENT WARNING: (1) ACCORDING TO THE SURGEON GENERAL, excessive drinking of alcohol can lead to certain risks, including liver damage and heart disease. (2) Drinking alcohol during pregnancy can lead to fetal alcohol syndrome, a condition that can cause physical, behavior, and learning problems.
