## Why same or next day visit guarantee?

When a client calls we see her that day or the next because infant feeding or pain with nursing issues simply cannot be delayed. It's our promise.

## Why in-home visits?

We feel strongly that moms and babies benefit most from a lactation consultation that takes place in the privacy of their own home with their own chair, sofa, pillows or even bed, because this is where breastfeeding takes place.

## Why up to 2 hours (or longer) for an initial visit?

We observe a feeding, teach skills, weigh the baby and create a care plan—always taking the time needed to make breastfeeding work. Our goal is to leave Mom and Baby feeling confident that challenges can be overcome so they can reach their breastfeeding goals.

## What does this cost?

Our visit fees are structured so families can afford the personal care of a certified Lactation Consultant and many insurance companies reimburse for those costs. Please refer to our website for current prices.

## Is it worth it?

Yes! Our fee is less than the cost of a month of formula. Breastfed babies are smarter and healthier than their formula-fed peers. Moms who breastfeed have lifelong protection from many serious diseases and they lose the baby weight faster too!

## I'm going back to work....

### Can I continue nursing my baby?

Absolutely! We can help you select a pump and teach you how to use it.

## Our in-home service includes:

Same or next day visit

Thorough assessment of nursing

Teaching evidence-based breastfeeding techniques

Postpartum screening and adjustment

Weighing your baby

Personalized care plan

Feedback to your health care provider

Continued free phone support

Superbill for insurance reimbursement
