

fw30-pro³

OZONE
generation system

1) 30gph ozone production @ 5% concentration by weight ozone system with diagnostics LCD display

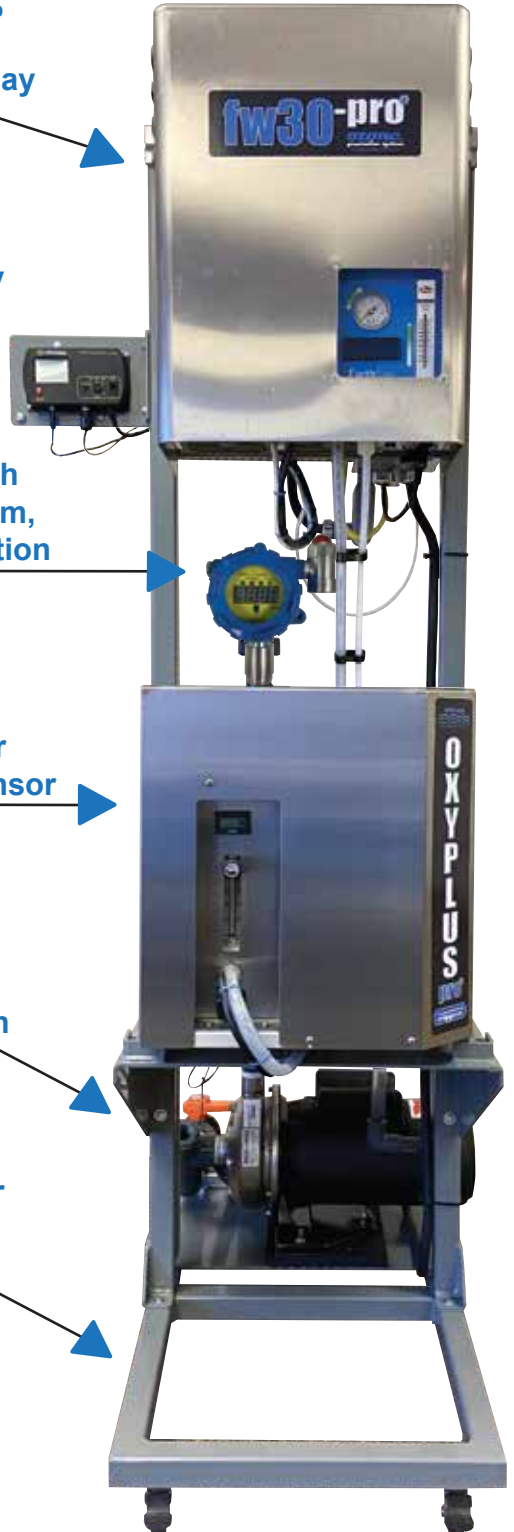

2) 0 - 600mV ORP controller with high pressure probe, automatically adjusts ozone treatment output

3) 0.01 - 10ppm ozone sensor with safety warning light and audio alarm, controls ozone system on/off function

4) 0 - 15scfh @ 93% pure oxygen concentrator with output controller and internal thermal protection sensor

5) 1.5HP Ebara recirculation pump and mazzie configuration allowing 0 - 20scfh vacuum suction

6) Heavy industrial grade powder coated metal stand with castor or stationary support feet options
