

Duck Pond

-DESCRIPTION:

Player uses a fish net to catch ducks floating in water

-HOW TO SET UP GAME

Set game as close to the front of booth as possible.
The booth should have a low front or no front.
Fill pond (game unit) 1.5" to 2" with water
Plug water pump into power source

SUPPLIES YOU NEED TO SUPPLY

you need a method to get water to the game
When placing the unit keep in mind some water will spill out. So be sure to locate game in a area friendly to water.
You may want a black felt marker to put your own numbers on the ducks
Five small boxes or baskets numbered from 1 to 5 to put small prizes in

- HOW TO PLAY

- a) The ducks should be numbered from 1 through 5. If not you can write you own numbers / system on them.
- b) Once a player nets a duck, look at the ducks number and allow the player to pick a prize from the basket that Correspond with that number.
- c) Make sure the prize you use cost less then the cost of the game. Or you can give one ticket.
