

In the time in which we find ourselves, cyber security is no longer an option, but a necessity. Allow White Rock Cybersecurity to leverage its expertise in cyber security to bring highly effective and cost-effective security solutions to your schools and districts.

Malware Protection | Ransomware Protection | Cloud Security | Mail Security | Encryption

Bitdefender

Bitdefender – Featuring Bitdefender’s adaptive, layered endpoint security powered by patented machine learning technology. Multi-layered protection with proven machine learning, advanced heuristics, anti-ransomware, powerful anti-exploit, signatures, Firewall and Device Control are all included in each of these options: Bitdefender GravityZone Business Security, Advanced, Elite and Ultra solutions

ESET – anti-virus, mobile security, file security ESET combines multilayered technology, machine learning and human expertise to provide our customers with the best level of protection possible. All ESET Endpoint Security products have the ability to detect malware pre-execution, during execution and post-execution.

Products include ESET Endpoint Protection Standard, Advanced, EDR, Full Disk Encryption & Dynamic Threat Defense (cloud sandboxing for better protection)

Forcepoint

Forcepoint (Websense) - Forcepoint Cloud Security delivers leading APT protection with security for cloud applications, email, web, and data. Forcepoint brings together a legacy of security from Websense®, Stonesoft®, Raytheon Cyber Products and Skyfence CASB (Cloud Access Security Broker). Forcepoint enables organizations to safely embrace business in the cloud.

KASPERSKY

Kaspersky – Endpoint Security for Business protection for desktops, mail and gateway. Features include anti-malware, anti-ransomware, static and dynamic machine learning, firewall, OS firewall management, cloud-assisted protection, integrated EDR agent, dynamic whitelisting, web and device control, server protection, protection for terminal servers, mobile endpoint security, and so much more.

Products include Endpoint Security for Business Select, Advanced, Total Security, Cloud and Cloud Plus solutions, MSA Support, and more.

KnowBe4
Human error. Conquered.

KnowBe4 – Cybersecurity Awareness Training and Phishing tests for your faculty and staff. Equipping your faculty, staff and employees strengthens the security of your environment. Our SaaS subscription is priced per seat, per year. We offer Silver, Gold, Platinum or Diamond levels to meet your organization’s needs.

mimecast

Mimecast Get ahead of email and web security issues with an integrated, cloud-based platform that’s always working, always protecting. Email protection: at your email perimeter, inside your network and organization and beyond your perimeter

SentinelOne®

SentinelOne – SentinelOne Endpoint Protection Platform (EPP) EPP unifies prevention, detection, and response in a single purpose-built agent powered by machine learning and automation. EPP, EDR, Manageability, Vigilance MDR and Cloud Intel (threat feeds, IP reputation, Automated analysis and Shared Intelligence).

SOPHOS

Security made simple.

Sophos – Intelligent Endpoint Detection and Response Sophos Endpoint Protection makes it simple to secure your Windows, Mac and Linux systems against malware and other endpoint threats. Web, application, and peripheral access policies can follow your users anywhere they go. And, your firewall and endpoints can share a security heartbeat.

Sophos Intercept X Advanced with EDR integrates intelligent endpoint detection and response (EDR) with the industry’s top-rated malware detection, top-rated exploit protection, and other unmatched endpoint protection features. Features include foundational techniques, deep learning, anti-exploit, and CryptoGuard anti-ransomware.

Products include Sophos Intercept X, Intercept X Advanced, Intercept X Advanced w/ EDR or Intercept X Advanced w/ EDR and MTR (managed threat response with 24/7 monitoring and response) and more.

Securing Your
Connected World

Trend Micro – worry-free services; Simple, complete, trusted protection for your business

Trend Micro Worry-Free Services uses a blend of advanced threat protection techniques to eliminate security gaps across any user activity and any endpoint. It constantly learns, adapts, and automatically shares threat intelligence across your environment: Automatic detection and response against an ever-growing variety of threats, including fileless and ransomware.

Some of Trend Micro’s solutions include Worry-Free Services, Email Security, Enterprise Security, ScanMail, Data Loss Protection, Mobile Security, Smart Protection

zix®

Zix – Email Threat Protection ZixProtect for Office 365 is a cloud-based security solution that protects inbound and outbound email by combining advanced threat protection, encryption and data loss prevention to deliver increased security with an easy-to-use experience. ZixProtect for Office 365 provides 99.5% accuracy in detecting phishing, zero-hour malware, ransomware, business email compromise, spam, and more. Enhance Office 365 with added Email Threat

Protection, Encryption and Data Loss Prevention.

Choose from ZixProtect Essentials, Plus or Premium solutions

Whether looking for endpoint protection, mail security or backup and recovery solutions, we are here to assist you. Contact me to schedule an up close look at any of these products.
