"Always Be There" with Meraki Cloud Managed Sensors

DECEMBER DISCOUNT

It's Sunday morning and you're receiving an unusually large volume of service outage complaints from end users. Something may be wrong at the data center, but it's hard to tell what's going on. Burst pipe? Cooling issue? Intruder?

You'll never be away with our **Always Be There** bundle of Meraki cloud managed sensors and remote cameras.

- **Cloud-Managed Indoor Open/Close Sensor:** monitor access to restricted areas or doors left ajar.
- **Cloud-Managed Indoor Temperature and Humidity Sensor:** create alerts to notify you of changing temperature and/or humidity conditions to prevent network outages, equipment failure or product loss.
- **Cloud-Managed indoor Water Leak Detection Sensor:** continuously monitor your HVAC system for malfunctions causing leaks, burst pipes, etc. to prevent premature equipment failure, product loss or network outages.

With just your smartphone, you can be notified instantly if there's a water leak, sudden temperature change, or intrusion. And with one click you can visually see in HD what's happening.

If you would like more information, please contact me at the information below.
