

For over three decades, Educate-me.net has helped schools with their A/V and IT needs. Educate-me.net offers a vast selection of products from leading manufacturers. From installing a new interactive projector to upgrading a classroom or an entire district, we can help you find a solution that meets your needs and budget.

**GoGuardian** Classroom Management Software Suite allows you to teach face-to-face, even when remote and hybrid teaching, with video conferencing capabilities. Access all of your filtering, classroom management, student safety, and device inventory needs from one location. The suite includes tools like GoGuardain Admin, Teacher, Fleets, DNS and Beacon.

## GoGuardian Beacon™

With over 90% of active planning alerts occurring in Search, it is critical to have a solution that can spot warning signs wherever the student is online. Unlike other solutions that only focus on G-Suite or Office 365, **Beacon works across search engines, chat, social media, email, web apps, and more.** Beacon alerts provide robust context around an event, helping you determine what caused an alert and how to take action. Alerts include screenshots, the phase of ideation, historical activity, and highlighted text.

**Clear Touch** Interactive panels empower a new generation of teaching and learning without all of the logistical headaches. Our interactive displays are the ideal classroom technology solution, being easy-to-use, simple to install, and providing more than 50,000 hours of hands-on classroom use.

Transform your classroom with **Epson's** high-performance, network-ready BrightLink® interactive projectors, Epson projectors eliminate the need for a dedicated electronic whiteboard.

## GoGuardian Admin™

GoGuardian has found that the majority of explicit content actually occurs in legitimate education tools. Their powerful AI engine learns and dynamically updates to keep up with changing content so you don't have to.

With GoGuardian Admin feel confident knowing that your students are safe anywhere they venture. Unlock the potential of educational tools like YouTube, and set digital guidelines for students to follow. GoGuardian's flexible YouTube filtering options allow you to curate your school policies to block comments, keywords, and live chat, as well as entire video categories.

\*Beacon Starter is included at no additional cost

## GoGuardian Teacher™

**GoGuardian Teacher** allows you to know what students are doing on their devices and whether they are off-task or need help. Online distractions are a frustrating part of incorporating technology in the classroom. By using automatic alerts and powerful commands, you can quickly and easily get students back on-task.

### New from MAXCases – Extreme Shell-L

The Extreme Shell-L delivers robust, full-coverage protection in a lightweight and budget-friendly design. The rugged top with overhang corners protects the expensive-to-repair device screen. School districts and educators always qualify for our best volume pricing. Not to mention free samples. Find cases with a perfect fit for your school's Chromebooks, iPads or other devices.
