How to Study Math Flash Cards

Review each card, and remove any formulas that you already know. Study only the cards with formulas that you have not yet memorized. To increase your retention of the formulas, try these study methods:

- 1. Write out the formulas and their components.**
Transferring the formulas to paper helps transfer the information into your long-term memory.
- 2. Group formulas by content area.**
By placing the cards in groups, such as “Circles” or “Transformations,” you can begin to see connections between formulas that may help with memorization.

(Continued on back of card)

Order of Operations

A fundamental principle of all math is the order of operations. This rule sets precedence for which operations are performed first when solving or simplifying expressions and equations. The six operations are addition, subtraction, multiplication, division, exponentiation, and grouping, and their order of precedence is often remembered using the acronym PEMDAS.

Each of the letters in PEMDAS represents an operation and its order of priority:

P arentheses (grouping)	1st
E xponents	2nd
M ultiply	3rd
D ivide	3rd
A dd	4th
S ubtract	4th

POWERSCORE Full Length ACT Course

The most comprehensive live ACT course for the most important test of your academic career!

The **Full-Length Course** offers:

- ✦ 40 hours of class time
- ✦ 4 full-length practice tests
- ✦ 5 point score increase guarantee
- ✦ 95th percentile instructors
- ✦ Over 1500 pages of course material
- ✦ 15 hours of ACT Hotline assistance each week
- ✦ Online Student Center Access
- ✦ 2 take-home tests
- ✦ Extensive homework and optional problems sets with full explanations for every problem
- ✦ Customizable courses for schools and groups
- ✦ \$1000 Perfect Score Scholarship

FOR MORE INFORMATION, VISIT POWERSCORE.COM
(800)545-1750 WWW.POWERSCORE.COM

POWERSCORE Live Online ACT Course

Comprehensive live instruction from the comfort of your home.

The **Live Online Course** offers:

- ✦ Live, interactive instruction via the internet
- ✦ 18 hours of class time
- ✦ 6 full-length take-home tests with detailed score reports
- ✦ 4 point score increase guarantee
- ✦ 95th percentile instructors
- ✦ Over 1400 pages of course material
- ✦ Online Student Center Access
- ✦ Extensive homework and optional problems sets with full explanations for every problem
- ✦ Customizable courses for schools and groups
- ✦ \$1000 Perfect Score Scholarship

How to Study Math Flash Cards

3. Write sample questions that require each formula.

You can find existing questions from *The Real ACT Prep Guide* grouped by content in the Red Book Database on the book owner's website. Use these questions to write your own example questions, along with detailed solutions to your questions. The most effective strategy for learning information is to teach the information to someone else.

4. Have someone quiz you.

Enlist a family member or friend to quiz you on each flash card. If you correctly identify or explain a formula, place a check mark in the target on the flash card. Once a formula is completely memorized, remove it from your stack of flash cards.

POWERSCORE Supplemental ACT Prep

ACT Private Tutoring

Private tutoring gives you the opportunity to work face-to-face with one of our highly qualified instructors, who can quickly pinpoint your strengths and weaknesses and create a individualized curriculum to address your needs. Please call or visit our website to learn about our tutoring packages and availability.

Home Study Course

For some students, independent study and practice is the best test prep solution. We offer a home study course which includes the Full-Length ACT course books, access to the Online Student Area, and a copy of *The Real ACT Prep Guide*. To learn more about this package, please call our office or visit our website.

Order of Operations

P E M D A S

Let's look at an example of an expression in which of the order of operations is required:

$$5(1 + 4)^2 - 10$$

Begin with operation in the parentheses (P):

$$5(1 + 4)^2 - 10 = 5(5)^2 - 10$$

Now remove the exponents (E):

$$5(5)^2 - 10 = 5(25) - 10$$

Multiplication and division are next (M/D):

$$5(25) - 10 = 125 - 10$$

Finally, addition and subtraction are performed (A/S):

$$125 - 10 = 115$$

POWERSCORE Weekend ACT Course

The original Weekend Course delivers intense instruction in a single weekend, to better fit your busy schedule.

The **Weekend Course** offers:

- ⊕ 12 hours of class time
- ⊕ 5 full-length take-home tests
- ⊕ 3 point score increase guarantee
- ⊕ 95th percentile instructors
- ⊕ Over 1200 pages of course material
- ⊕ Email Assistance Program after the course
- ⊕ Online Student Center Access
- ⊕ Extensive homework and optional problems sets with full explanations for every problem
- ⊕ Customizable courses for schools and groups
- ⊕ \$1000 Perfect Score Scholarship
- ⊕ Incredibly low price

integer

Any number in the set of positive and negative whole numbers and zero:

$$\{\dots -4, -3, -2, -1, 0, 1, 2, 3, 4\dots\}$$

- Integers do not include fractions or decimals
- Integers are the most commonly used numbers on the ACT
- It is important to remember that 0 is an integer

FOR MORE FLASH CARDS, VISIT POWERSCORE.COM
© COPYRIGHT 2012

set

A collection of numbers marked by brackets:

$$\{4, 6, 9, 13\}$$

- Sets can contain any amount of numbers
- Sets may have rules, such as “all even integers”

FOR MORE FLASH CARDS, VISIT POWERSCORE.COM
© COPYRIGHT 2012

digit

The numbers 0 through 9:

$$\{0, 1, 2, 3, 4, 5, 6, 7, 8, 9\}$$

- *Place* is used to represent where in a number a digit occurs
- The ones digit or units digit in 3748 is 8
- The tens digit in 3748 is 4
- The hundreds digit in 3748 is 7

FOR MORE FLASH CARDS, VISIT POWERSCORE.COM
© COPYRIGHT 2012

sum

The amount obtained by adding numbers

- The sum of 2, 3, and 4 is 9: $(2 + 3 + 4 = 9)$
- The sum of x and y is $x + y$

FOR MORE FLASH CARDS, VISIT POWERSCORE.COM
© COPYRIGHT 2012

product

The amount obtained by multiplying numbers

- The product of 2, 3, and 4 is 24: $(2 \times 3 \times 4 = 24)$
- The product of x and y is xy

FOR MORE FLASH CARDS, VISIT POWERSCORE.COM
© COPYRIGHT 2012

multiple

An integer that is divisible by another integer without a remainder

- Multiples of 3 include $\{-6, -3, 3, 6, 9, 12\}$
- Multiples of 4 include $\{-8, -4, 4, 8, 12, 16\}$

divisible

Describes a number capable of being divided without a remainder. A number that is divisible by x is also said to be a multiple of x .

- 18 is divisible by 1, 2, 3, 6, 9, and 18
- xy is divisible by 1, x , y , and xy

FOR MORE FLASH CARDS, VISIT POWERSCORE.COM
© COPYRIGHT 2012

factor

One of two or more numbers that divides into a larger number without a remainder

- Factors of 18 are 1 and 18, 2 and 9, and 3 and 6
- Factors of xy include 1 and xy , plus x and y

Rules of Divisibility

- 2: If the last digit of a number is even, it is a multiple of 2.
- 3: If the sum of the digits is divisible by 3, the entire integer is a multiple of 3.
- 4: If the last two digits are a multiple of 4, the entire number is a multiple of 4.
- 5: If the last digit ends in 0 or 5, the entire number is divisible by 5.
- 6: If the number is both divisible by 2 and 3, it is divisible by 6.
- 9: If the sum of the digits is divisible by 9, the entire integer is a multiple of 9

rhombus

1. Each side is equal length.
2. Two pairs of parallel sides.
3. Opposite angles are equal.
4. Diagonals bisect each other.
5. Diagonals are perpendicular.
