## IMPERIAL RUSSIA AID TO THE UNITED STATES AND THE WORLD

A collection of historical articles carefully researched and written by 14 distinguished scholars describing the many, but little-known positive effects Imperial Russia had upon world history during the reign of the House of Romanov.

Romanov aid included assisting General George Washington with strategic pressure against England's King George III and British forces during the battles for America's independence, providing President Lincoln with Russian Naval forces to guard our coasts against foreign interference in the United States Civil War, defeating Napoleon in Europe, giving the Jesuit Order protection from Papal Suppression, blocking the destruction of the Order of Malta, providing disaster relief, rescue teams and humanitarian aid in the aftermath of the devastating earthquake in Messina Italy. Many little-known instances of Romanov aid and support impacting world history are documented in detail by 14 history scholars and complimented with 180 images in this colorful book authenticating 140 years of peace and tranquility between the House of Romanov and the United States.

*"I strongly endorse this collection of essays on the little-known history of harmonious relations Russia enjoyed with the United States during the time of the later Russian Empire".*

*Count Nikolai Tolstoy*
