

Pirate Ship STEM Challenge

Mission: Build a boat that can hold treasure without sinking and then turn it into a sailboat that can sail across a small body of water!

Materials needed: Watch the video for ideas of materials to use around the house.

1. Scissors
2. Tape
3. 10 Coins
4. Materials for the boat: waterproof items like a styrofoam cup or plate, plastic cup or plate, or foil.
5. Materials for the mast and sail: Construction paper, straw, stick, or other recyclable materials
