

110V

CHEMICAL ALARM INSTALLATION INSTRUCTIONS

- 1) Using provided screws and wall anchors, install the sanitizer alarm box on the wall closest to the dishwasher control box.
- 2) Attach the conduit fitting to the back of the control box.
- 3) Connect white wire to the power block inside the control box (connect to the white terminal).
- 4) Connect orange wire to the bottom terminal on the timer's third micro-switch (drain micro switch).
- 5) Connect chemical lines to vacuum switch.
- 6) Prime sanitizer pump

The dishwasher is now equipped with the Low level Chemical alarm system. It will alert the dishwasher operator when the sanitizer supply bucket is low and needs to be changed.
