

# WE MODERNIZE & MOBILIZE NOTES DOMINO TO ACCELERATE YOUR MIGRATION STRATEGY

## Developers

Leverage existing Lotus Script code to respond to web events, track external data, or to perform complex backend actions.

## Executives

Reduce Notes client license costs and accelerate time to value by using existing resources and know-how

## End Users

Access modern and responsive HTML 5 Notes Domino applications from anywhere, using any browser or device.

## App Managers

Enable anyone to rock the web without Java, JavaScript or xPages. Easily create new enrich existing actions.

## HOW WE WORK

teamWorkr accelerates time to value by creating a browser-based application experience without recoding or moving off the Domino platform. The strength of Domino security is fully maintained as teamWorkr leverages an embedded Notes database.

Organizations can target specific applications or leverage the teamWorkr Analyzer tool to establish an optimized modernization strategy. By using teamWorkr for one month, you have the power to convert hundreds of applications to the web, written in Lotus Script, reusing years' worth of proven business knowledge.

# WE MODERNIZE NOTES DOMINO

EASY. FAST. SECURE. ANYWHERE.

With just a few clicks, you can mobilize entire IBM Notes Domino applications, keeping existing security concepts fully intact.

## Analyze

Gather a comprehensive, use-oriented overview of the entire application landscape to compare the relevant and non-relevant applications and explicitly point out hidden content.

## Modernize

Quickly extend the reach, value, and life of applications by giving them a modern and responsive HTML 5 look and feel. All minimal development effort.

### OUR PROCESS

## On-Prem or Cloud

Your data is protected no matter where you are. All current security configurations will not be altered under any circumstances with teamWorkr.

## Cost Savings

Eliminate the significant investment of time and money need to build new solutions by extending the value of existing data, assets and business logic.

## WHY teamWorkr?

teamWorkr is the most efficient way to plan, execute and manage application modernization. Reduce time spent planning and developing new applications by leveraging teamWorkr's low code approach to revitalize current applications.

Rapidly modernize your applications, which are proven over the years, without losing workflow, security or functionality, to maximize the return on your initial investment in Domino. Reduce time spent planning, eliminate the need to recode and establish an modern user-experience with teamWorkr.
