

# WE PROVIDE SMART SOLUTIONS TO ENHANCE MICROSOFT COLLABORATION

Who We Work For

## Senior Management

Highlight areas where value can be realized and where ROI can be increased

## Administrators

Identify trends, delegate tasks and reallocate resources to maximize efficiency

## End Users

Reduce downtime and latency to ensure the best possible end user experience

## Security Managers

View Audit Trails and manage who has access to what, with AD role-based delegation

## HOW WE WORK

VitalSigns 5.1 leverages PowerShell and end-user simulations to monitor the performance and availability of each Exchange Mail component in your environment - in real time. VitalSigns includes dedicated health pages, trend reporting, proactive notifications alongside the powerful administrative features like PowerScripts.

**PowerScripts** are an encrypted library of PowerShell commands that can be accessed with Active Directory credentials and run on-demand. Administrators have full control of permission levels allowing them to easily delegate commands to other users. **PowerScripts** can be run by vetted users at anytime against servers, mailboxes or users.

# WE PROVIDE SMART TOOLS

TO GROW MICROSOFT COLLABORATION

Optimize performance, ensure availability and realize cost savings in Microsoft Office 365, Exchange, SharePoint, Skype, Teams and OneDrive.

## PowerScripts

Run PowerShell commands with the click of a button and enable junior admins with role-based delegation. View an Audit Log to easily monitor who ran what script, and when.

## Exchange Health

Gather actionable insights on DAG Health, Database Storage, Connectivity Status and Exchange Services. Leverage these insights to troubleshoot failures and proactively identify issues.

WHAT'S  
INSIDE

## Mail & Users

Test mail flow between multiple combinations of servers, identify and mitigate storage issues, analyze in-depth reports and make corrective or mass changes with PowerScripts.

## Live Dashboard

View dedicated health pages with live data for each technological component, team or geographic location. For high-level analysis, see the main dashboard or the executive overview.

## WHY VITALSIGNS?

VitalSigns 5.1 is a powerful solution right out-of-the-box that can be enhanced by IT Administrators using the VitalSigns Configurator to customize parameters, quotas, alerts and reports with ease. VitalSigns 5.1 is able to proactively identify inefficiencies and potential issues before end-users experience a disruption in service.

Maximize performance, identify trends and minimize downtime with VitalSigns Exchange monitoring, administration and reporting.
