

## **Axiom, the right choice for Southport ...**

### **Project Construction:**

Over the next year Axiom Technologies is teaming with Hawkeye Connections to build Southport's fiber optic broadband network. Axiom and Hawkeye look forward to working together on Southport. If you see Hawkeye trucks or meet someone unexpectedly walking down your driveway, this "on the ground" survey work is the next step of the process to determine where Southport's fiber cables will be placed. Hawkeye and Axiom trucks will become a fixture in the community as they do their work to construct our "Fiber to the Home" network.

### **Internet Service Provider:**

Axiom, in business for over 17 years delivering critical communication services to rural Maine communities, will oversee our fiber network construction and be our Internet Service Provider. In the months to come, Axiom will take pre-installation phone calls to discuss any questions the community may have, and take subscription sign ups. Axiom will work closely with town officials and the Southport Broadband Committee to keep everyone informed of the progress. We look forward to talking with you!

## **Questions?**

**Ready to sign up for service?**

**Contact Axiom:**

**207.255.0679**

**OR**

**info@connectwithaxiom.com**

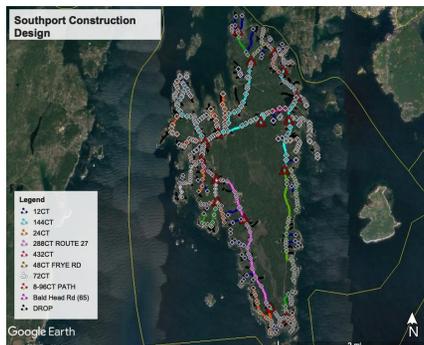

**Sign up before construction begins and your installation is free!**

**A \$99 deposit will hold your spot. (This fee will be returned to you as a credit on your account.)**

**We will need to know the location of your home.**

# **Axiom**

every connection counts

# **Southport Fiber**

**Your Community Owned  
Fiber To The Home  
Broadband Network**

**In partnership with  
Axiom Technologies**

**Because Axiom returns a portion of the subscriber revenue back to the community to pay for the construction of the network- your service subscription is critical to the success of this project. Signing up for service does not just mean great speeds and unmatched reliability ... but you are helping to make this municipally owned network a valuable town asset.**

**Why choose Axiom’s fiber optic network for your Internet service, phone, and streaming services instead of a network constructed of copper cables?**

- **A fiber optic network is the most reliable form of internet service delivery - it just works.**
- **No slow-down in speeds- the system is designed to give you what you pay for. In fact Axiom guarantees that the speed you pay for is what you get- no “best effort” or “up to” speeds- even at the most demanding times.**
- **SAVE- by switching your cable viewing to on-line streaming you can “cut the cord” and save money- let us show you how!**
- **You are supporting your community- this network is owned by Southport and your subscription supports your community.**

Southport’s fiber optic network will provide equal access to every island property, with reliable speeds and dependable service that will give you a whole new perspective on what it means to be truly connected to the world.

Work and or learn from home? By choice or necessity? We will help you choose the service that best meets your needs. No contracts and no rising costs or hidden fees. AND ... FREE installation for early subscribers.

Your favorite entertainment channels will stream into your home at speeds you simply can not get on a copper based network. We will walk you through the process with classes and coaching.

A fiber optic network can provide the secure transmission of data required for online tele-health visits with your doctor and other healthcare providers. In rural Maine this can be a life saver!

## Speeds and Pricing:

Subscriber	Service Type	Service Fee
Year-Round	50/50M	\$59.99 per month
	100/100M	\$69.99 per month
	500/500M	\$109.99 per month
Seasonal	50/50M seasonal	\$611.99 per year
	100/100M seasonal	\$713.99 per year
	500/500M seasonal	\$1121.99 per year

- **No hidden fees or taxes- the prices above are what you pay.**
- **Seasonal customers have service for 6 months ... May 1st - Nov 1st.**
- **Seasonal customers receive a 15% discount off the cost of yearly service and are billed annually at the beginning of the season.**
- **Business rates are also available. Please call Axiom for pricing information.**

## How does this fiber network get to my home or business?

The installation crew from Hawkeye Connections will build the layout, attaching fiber optic cable to the island’s existing utility poles. Subscriber service will be provided by fiber drop lines installed from the poles to the properties. In most cases these new fiber lines will follow the existing electrical service lines. Once on the side of your home, the cable will enter into a small service box at a location you choose.
