SNOWFLAKES AND HEARTS	3+	Be Dazzling Gold Specialty Paper	-	So Many Snowflakes Dies , Snail Mail Heart Dies , STAMPIN' CUT & EMBOSS MACHINE 149653

DIRECTIONS FOR PLATFORM

1	Stamp Sentiment and snowflakes you'd like to show behind the shaker window onto one of your 5" x 3.75" white cardstock pieces. Set aside.
2	Cut the Window frame DSP and cardstock backing to size. Leaving a larger margin on the bottom of the frame, use frame die to cut window openings. Remove all chads from negative spaces.
3	Cut window film to size. Tape or glue in between window frames lining up snowflakes on both sides to hide interior frame. Make sure there are no gaps between the edges of the film and the frame or your shaker contents will fall out.
4	Remove tape backing from one side of the foam adhesive strip and fix to back of window frame to create a 'corral' for your shaker contents. Leave no gaps. Do not remove tape backing that is facing up yet.
5	Empty your shaker contents into the corral. Face piece down that you want to show to the viewer.
6	Remove tape backing from foam adhesive and apply the sentiment (larger margin along bottom edge of window and face down) to the frame and contents. Line up with edges of front as good as you can.
7	Give your card a shake to check for leaks. If all is well, affix the shaker platform box to the card base front.

Snowflake	1	Shimmery White DSP	Small	

DIRECTIONS FOR EMBELLISHMENTS

1	Cut DSP pieces, snowflakes and hearts to size. Set Aside.
2	Punch, stamp and cut Snowman pieces and assemble. Set aside.
3	Affix scalloped snow 'ground' (scallops up, like fluffy snow, not points up like waves) to thicker, weighted bottom margin edge of window frame.
4	Add Snowflakes, Snowman and heart on top of scalloped ground.
5	Wrap Baker's Twine around platform ledge. Tie a bow and affix with a dot of glue in a way you find pleasing.
6	Add sentiment paper to inside of card if you choose to.
7	If back of card is messy, consider adding a piece of DSP to back (about 5" x 3.75") and sign back.
