From: Director, Logistics Operations Analysis Division (LX)
To: Mr. James L. Vincent, Southwest Region Fleet Transportation
Subj: LETTER OF APPRECIATION

1. In February of 2014 Logistics Operations Analysis Division (LX), Installations and Logistics, Headquarters Marine Corps was asked by the Commanding General of Marine Corps Installations Command (CG MCICOM) to analyze non-tactical vehicle (NTV) accident reduction strategies currently in place or considered for implementation in terms of benefit, cost and effort. This task involved a great deal of coordination, consolidation of valuable data and an understanding of current processes, all of which could not be accomplished without your involvement and effort.
2. The timely data and information you provided, many of which resided external to your organization, allowed LX to successfully complete and present NTV accident reduction analysis to CG MCICOM. This analysis was able to show potential savings in the millions of dollars over a time period, stemming from the impact of telematics device use. All in all, this could not have been done without your exhaustive support, expertise and your passion for helping.
3. I am very delighted to present this small token of our appreciation for a tremendous and arduous task superbly done. I look forward to any future work together that can leverage your true professionalism and high-valued skillset; as I am certain that you will always deliver and never cease to amaze. Again, I greatly thank you for your support, BRAVO ZULU!

D. N. REBER
