Save this brochure for reference for the season and use enclosed order form for first order.

We are happy to be back for another season and this year we have a few new varieties for you to enjoy – some are a re-introduction of old favorites that are back by popular demand.

Pest repellent plants are in with citronella and pennyroyal leading the way. (Please see cautions on pennyroyal in the perennials from seed section.) Pineapple sage and strawberry mint are adding a delightful fragrance that will attract butterflies, bees and customers alike. We have also expanded our culinary basil to include lemon and thai again. New lavenders Grosso and Goodwin Creek Grey are showy and great for drying. Lastly gold sage and variegated Berggarten are bring in new color – quantities limited!

Some of the newer varieties may be in limited quantities as an introduction. If you have any questions, please contact. us!

All plants will feature a label for ease in identification and come in a deep 4” square pot packed in a display flat (18 pots) that keep the plants organized, upright and easy to move. We are growing our herbs in soil designed to promote the healthiest plants possible.

The 1206 (72 cell) containers are 12 packs of 6 plants in a full size 1020 flat and are useful for direct sale to customers in 6 packs or for moving up to larger pots or mixed containers. Herbs in 1206’s will be gladly grown as a special order placed **6-8 WEEKS** in advance of the date that you need them.

This year we will, again, be preparing periodic availability lists. If you wish to receive this list by fax or email, **please** include your fax number or email with your first order. Please do not hesitate to call with any questions.
