

MARINE & RV BATTERIES

MARINE & RV BATTERIES

PRODUCT FEATURES AND BENEFITS

Better Performance Without Compromise

Every battery is designed and manufactured to the highest standards.

No exotic alloys or fancy trademarks, only time-tested technology goes into every battery.

WROUGHT CALCIUM, HIGH TIN GRID ALLOYS

Superior strength and corrosion resistance resulting in up to 40% more usable life.

PATENTED SECONDARY MAINTENANCE-FREE COVER

Separate liquids form gases allowing liquids to return back into battery.

COLD FORGED TERMINAL BUSHINGS

Eliminates terminal corrosion caused by acid wicking through traditional cast bushings.

INTEGRATED FOLD DOWN HANDLE

Provides safety method for handling. Conveniently folds away when not in use.

HYDROMETER EYE

Easy and convenient way to inspect the charge condition of the battery.

EXCLUSIVE 'SPUN BOND' PAPER

A key feature in dual purpose deep cycle designs. This unique design enhances cycle life by bonding to the positive active material.

HEAVY POLYPROPYLENE CONTAINER AND COVER

Designed to optimize element support while providing excellent durability, even in the roughest applications.

MORE ELECTROLYTE ABOVE THE PLATE

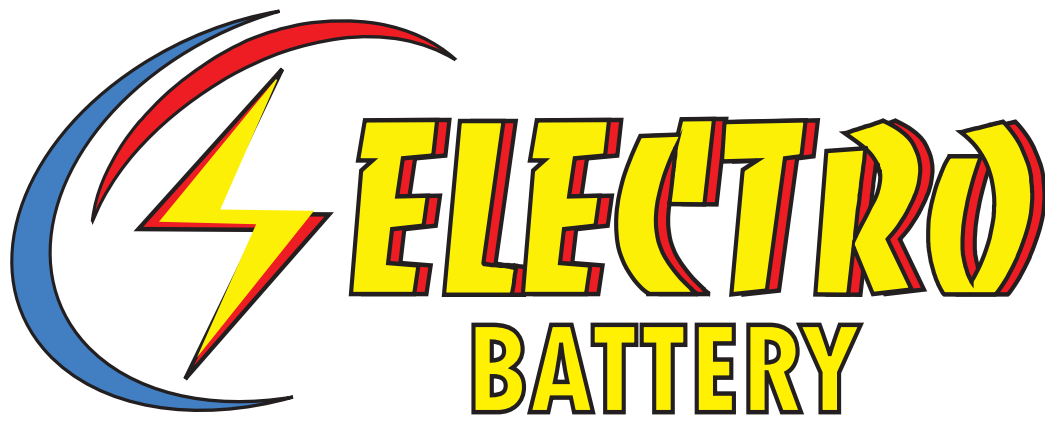

Up to 1/4" more liquid above the plates ensures long life and performance.

MODEL	PERFORMANCE			DIMENSIONS			TOTAL WEIGHT (LBS)
	CCA	MCA	RC	LENGTH	WIDTH	HEIGHT	
MARINE STARTING							
24M	500	600	100	10.24	6.85	8.74	37
24MHD	800	1000	125	10.24	6.85	8.74	43
27M	800	1000	160	11.97	6.81	8.86	49
MARINE/RV DEEP CYCLE							
24DC	600	720	140	10.24	6.85	8.74	42
27DC	680	820	160	11.97	6.81	8.86	45
31DC	830	1000	190	13.31	6.81	9.37	56
4D	1000	1140	300	20.00	8.74	9.49	82
8D	1250	1560	390	20.59	10.98	9.84	111
