

LUCY LABRUZZO

BOARD MEMBER SINCE 2018

Lucy Labruzzo leads the Energy Infrastructure Sector of Cordoba Corporation. Lucy joined Cordoba in 2014 and has since successfully led the expansion of their energy business into gas and electric transmission and distribution, renewable energy and program management across each of California’s investor owned utilities.

Lucy is a Mechanical Engineer and Certified Energy Manager with 30 years of experience working with utilities across the US and Canada, including energy efficiency, power generation – nuclear, gas and renewable energy – as well as electric and gas transmission and distribution infrastructure projects. She has been responsible for managing the development, design, construction, commissioning and funding of billions of dollars of major energy infrastructure projects throughout North America utilizing numerous creative project execution strategies.

Prior to joining Cordoba Corporation, Lucy held an executive position at large global infrastructure firm, where she led their North America Energy Business. She began her professional career as an engineer for the New York Power Authority, one of the nation’s largest state public power organizations.
