

Our hearts go out to parents who love and care for a child with chronic seizures. Our hearts go out to families with a terminally ill loved one with cancer and the pain it brings. But, we do not believe medical marijuana is the answer.

Time and time again we have observed that “controlled” substances cannot be controlled. The side effects of medical marijuana can be very damaging—physically, emotionally, mentally, and spiritually. I believe it is one of the worst gateway drugs.

Our Christian Action Commission (CAC) did their homework and talked with medical doctors and law enforcement personnel. On December 11, 2018, our CAC voted unanimously to oppose legislation to legalize medical marijuana in Mississippi. We Christians are to have a spirit-controlled, mind-controlled body.

Dr. Kenny Digby
