

THE GENERATIVE COUNCIL

Introducing the Generative Council Collective

As this remarkable human ecosystem of interconnected regional hubs and the impact of our work grew in 2020, we transformed from a “center” to a “collective”. The Generative Council Collective serves as a root network, fostering a web of reciprocity and symbiosis between its members and ensuring a vibrant and resilient ecosystem. We set out to create an unstoppable network of nature-informed women leaders across generations, sectors, and sociocultural barriers who transform human-made structures into nature-wise systems that sustain and inspire life on this planet.

Join us in growing our Generative Council Collective. This year we have two main goals:

- Increase our scholarship fund to ensure that all women have access to these resources and benefit from this network like you do.
- Establish a fund for a paid staff position that will support the Generative Council Collective as a whole and you individually in reaching their full potential.

This year we have cultivated a vision for the future of the Generative Council Collective and built strong roots to ground us in that work. We need your support in achieving these goals, strengthening our support of members like you, and growing our impact in the community. The Board of Directors have each committed to making a financial donation to achieve these goals and we invite you to join us in reaching 100% participation across our Generative Council Collective by making a donation or signing up to volunteer your time. Visit www.natureleadership.org/donate to make your donation today!
