

HPT Series

The HPT Series is our range of manual hand pallet trucks with capacity from 5,500 to 6,600 lb, offering a very competitive and reliable solution for lifting and moving operations. Engineered featuring European design, quality production processes, a wide range of fork sizes and hydraulic unit types, provide long-lasting strength and versatility.

FEATURES / ADVANTAGES

QUALITY PRODUCTION

HPT Series is designed in a dedicated production plant, with robot welding, specific painting system through epoxy-polyester powder coating, to ensure the highest level of performance and durability.

ENTRY / EXIT ROLLERS

Additional nylon rollers at the fork tip allows an easier pallet entry and exit. The wheels are designed to maintain optimal contact with floor, which helps users easily maneuver across dock plates, in and out of trailers and over uneven floors.

WIDE RANGE OF HYDRAULIC UNITS

Resistant and reliable one piece cast iron pump, in three different versions, worked with numerical control machine, including:

- Maximum pressure valve: safety device that ensures overloading the jack. When the pressure inside the hydraulic circuit exceeds the set calibration value according to the maximum nominal flow, the valve automatically locks the forks.

CONFIGURATIONS

STANDARD

Nylon steering wheels and Nylon rollers
2 curves steering Handle

OPTIONAL

Rubber and polyurethane steering wheels, polyurethane rollers. 4 curve covered handle ergonomic tiller.

STANDARD

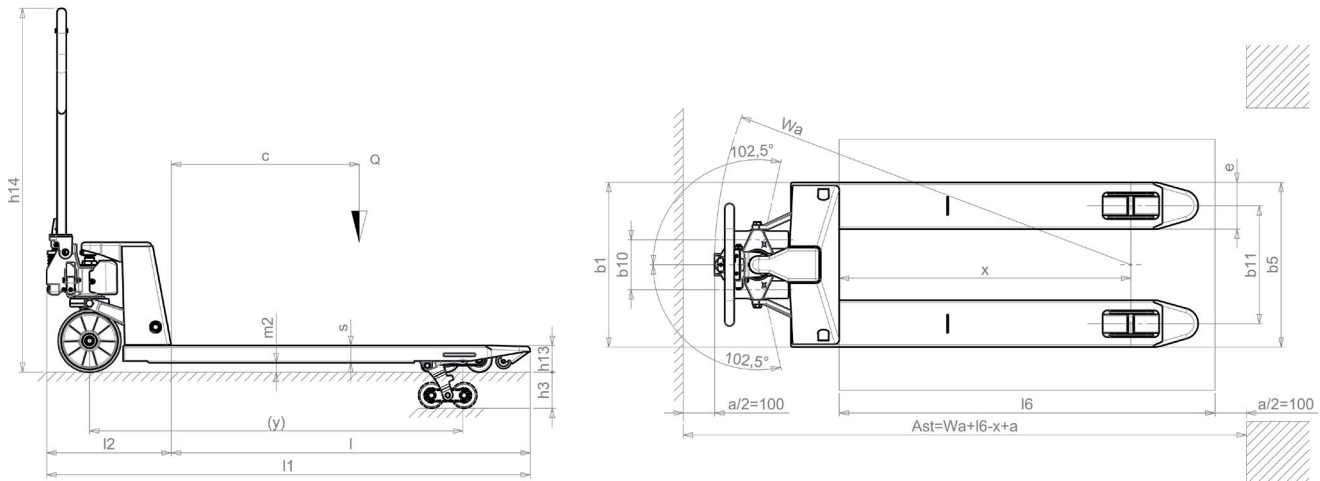

Quick lift. The perfect tool to lift loads up to 330 lb quickly. The hydraulic pump is specifically engineered to cut job time in half compared to standard manual jacks.
