Project Management Professional (PMP)

With Risk Management Professional (PMI-RMP) Training Course
(Examination Preparation Course)

Admission Requirement: GED, High School Diploma
Course Level: Below College level

Project Management Professional (PMP) with Risk Management (RMP) Course. In this course, a case study is threaded throughout the program, and includes activities (development of many of the planning deliverables and more), which enable participants to apply the lessons learned in the units to the projects they are currently on. The curriculum is presented in a dual fashion; the theory of PMI is balanced by the reality of the course instructors' project management experiences. The dual approach provides the student learner with real examples of the Project Management Institute (PMI) theory. Knowledge checks are given after lessons to measure the students' progress. An additionally, a 100-question practice PMP® certification exam is included. Upon successful completion of this course, you will be granted the 45 PDUs that are required before taking the PMP® certification exam. This course leads the student to understand the nine Project Management knowledge areas and the five process groups with the ability to distinguish between core and facilitating processes of Project Management.

Syllabus: Contact Hours Total: 80 Hours

Courses will be taught in Classroom #2

Programs Modules as a Curriculum
