

Register Now for Introduce a Girl to Engineering Day!

COMPUTER ENGINEERING MAKES AN IMPACT!

Computer science and engineering skills are critical to addressing challenges in today's world, from non-profits who make the world a better place, to stores who make shopping more convenient, to technology companies who connect people and bring them closer together. As we move deeper into the 21st century, these skills will become even more important for people in all industries.

Computer science and engineering are the base of technology, including building computers and other technology devices, making websites function, creating new software, designing apps and video games, and storing and sharing information. For our 15th Annual *Introduce a Girl to Engineering Day*, Nitsch Engineering is excited to showcase some of the ways in which computer engineering helps solve problems and improve lives, no matter what your career choice is.

When: Tuesday, March 1, 2016, from 9:00 AM to 2:00 PM

Who: Girls from 6th to 12th grade. An adult chaperone is welcome to accompany each girl.

Where: [Northeastern University, Egan Research Center, Boston, MA](#)

Attendance is limited, so please register as soon as you know you can make it. Our invitation list has increased dramatically over the last couple years and the event sells out quickly! If the event fills up, you will be able to sign up to be on the wait list. All registrations must be received by Tuesday, February 23rd.

For more information and to register, [please click here](#). More details will be sent to all registrants one week prior to the event.

If you have any questions, please feel free to contact Anna Luciano at aluciano@nitscheng.com.

We hope to see you on March 1st!
