

Fight Climate Change: Engineering a Resilient Future

Register Now for *Introduce a Girl to Engineering Day!*

For our 18th annual *Introduce a Girl to Engineering Day*, Nitsch Engineering is excited to share how engineers are helping to combat climate change and increase community resiliency!

When: Friday, March 1st, from 9:00 AM to 2:00 PM

Who: Girls from 6th to 12th grade

Adult chaperones are welcome to accompany each girl, and will have the opportunity to learn from college admissions staff!

Where: Nutter's office in Boston's Seaport

Attendance is limited, and the event fills up every year, so please [register via our online system](#) as soon as you know you can make it. Since this system is how we manage event capacity, the sooner you do this, the more likely you are to get a spot. After you have registered, you will receive a confirmation email with a link to our online health and safety form, which must be completed by Friday, February 22nd.

Register

Due to the popularity of this event and the fact that we sell out every year, we have limited group registrations to a maximum of four girls.

If you have any questions, please feel free to contact Anna Luciano at aluciano@nitscheng.com.

We hope to see you on March 1st!

Presented by:

Nitsch Engineering's annual *Introduce a Girl to Engineering Day* is a part of our commitment to increasing the representation of females in engineering. Since 2002, we have partnered with a range of companies and academic institutions to increase 6th to 12th grade girls' interest in engineering in a supportive and enthusiastic atmosphere.
