**Sherbrooke launches formal call for Wellington South projects**

Record Staff  
SHERBROOKE

The City of Sherbrooke launched its call for proposals for the development of a project to replace the defunct Well Inc. plan in the Wellington St. South area.

The call for proposals is intended for Quebec promoters with a minimum of 15 years experience in the realization of real estate projects.

Projects submitted must include the demolition of existing structures and the preparation of the site. A public multi-storey parking lot must also be provided as well as a public square. An area of at least 70,000 sq. ft. must also be reserved for the Entrepreneurship Headquarters, whose main building will have a minimum of four storeys and a maximum of ten.

Beyond these specifications, the City has drawn up a wish list. It would like the public square to exceed 20,000 sq. ft and the parking lot should have at the least 650 spaces. Parking access should be via both Depot and Wellington South. Moreover, the project should become a strong and significant link integrating the principles of universal accessibility

**Rising temperatures spark concern for Potton first responders**

DEBRA HARDING

**The Scoop**  
By Mable Hastings

Following a week of scorching heat, the Municipality of Potton mandated Prevention Specialist, Stephane Fortin and some members of the Potton First Responders (Alex Bechard, Eve Milanovic and Samuel Fortin) to go door to door checking on

those who might be vulnerable in light of the recent weather conditions with the focus being the Municipalities priority in keeping its citizens safe. The door to door visits were conducted on Thursday, July 5 from 9am through to 12:30pm in all areas of Potton Township.

116 persons were visited and while most were doing just fine, a fan was hooked up for one person and advice

given on the best ways to fight the heat was shared with all. The Responders who went out were happy to see that many of those visited were aware and vigilant in keeping themselves hydrated and cool.

The well-being of seniors and those vulnerable are a priority for the
