Monday, March 23, 2020

To Employers:

We advise you to comply with the latest orders and guidance from our national, state, and local officials in regards to your employees work attendance. Some of your employees may be at higher risk of complications from COVID-19 infection. The Centers for Disease Control and Prevention (CDC) identifies the following people at higher risk:

- People age 65 and older
- People with chronic lung disease or moderate to severe asthma
- People with heart disease with complications such as congestive heart failure
- People who are immunocompromised including those on cancer treatments, transplant recipients, poorly controlled HIV, and inherited immune deficiencies.
- People with poorly controlled diabetes, kidney failure, or liver disease.

We recommend that you provide a work environment that allows any of your employees that meet these high-risk criteria to maintain a distance of six feet from other workers, customers, and visitors or allow them to work from home if possible. You can find additional guidance from the CDC at:

<https://www.cdc.gov/coronavirus/2019-ncov/community/guidance-business-response.html>

We appreciate your understanding that we cannot provide personalized work notes or complete human resource forms for all of these patients during this global pandemic. We are thankful for all the measures you are taking to collectively fight COVID-19.

Sincerely,

The Physicians of Family Medical Center

John Fye, MD

Bradley Morin, MD

Aaron Frey, MD

Martha Shirley, DO

Nicholas Lemming, MD

Pamela Snook-Tidd, MD
