

SR TRAFFIC/TRANSPORTATION PROJECT MANAGER

ABOUT US

You know what we love about our company? We've created an environment where every one of us comes to work each day to do something we enjoy with people we care about. This job is **NOT** for you if:

- You are mediocre, lazy or uninspired
- You take the easy way out
- You handle constructive criticism poorly
- You can't work with a team

On the other hand, if you would rather become an all-star in a growing, dynamic and ambitious team, your world could be about to change. Each project is an adventure, so we're looking for a trustworthy adventure seeker. We like to work hard and improve each day, and we're never afraid of a new challenge. This is what makes us great.

As for what we do, LIVIC is primarily a site/civil engineering firm which focuses on land development, municipal services, traffic engineering and landscape design. With our experienced and dedicated team, we partner with our business community and top industry professionals to provide the responsive, creative and value-driven results that clients demand. Since beginning our firm in 2017, we have continued to work with some of the best clients in the region, clients that we've pursued because of shared values of integrity, hard work, collaboration and responsiveness. Our attention is always on making sure we accomplish what's best for our clients. And because we're a small firm, we aren't bound by corporate stakeholders and policies, so we have an unlimited potential to evolve our business in any direction.

ESSENTIAL JOB FUNCTIONS

LIVIC Civil is seeking a motivated candidate to fill a full-time position for Senior Traffic/Transportation Project Manager in its Transportation Division. This candidate's primary role will be to serve as a Project Manager for Traffic Analysis, Intersection Improvements, Roadway Improvements and Highway Occupancy Permits. While this position will primarily support LIVIC's existing workload, opportunities exist for the Project Manager to build their own team of professionals to support additional workload that can be secured through the Project Manager's relationships.

- Lead a team Designers and Engineers to complete project design and analysis, providing technical guidance to less experienced staff
- Conduct Traffic Analysis including Transportation Impact Studies and Traffic Signal Retiming and Corridor Studies
- Prepare Intersection, Roadway, & Streetscape Plans and Specifications
- Prepare Signing and Pavement Marking, Maintenance and Protection of Traffic, and Roadway and Site Lighting Designs
- Provide quality control of work performed by the Transportation Team
- Assist the Transportation Division Manager with Project Management and Client Interaction

- Coordinate with peers and project managers regarding project progress

A thorough understanding of PennDOT Publications, Design Process and Highway Occupancy Permit regulations are essential for the candidate.

PRIMARY QUALIFICATIONS

- Bachelor's Degree in Civil Engineering/Civil Engineering Technology or related field and 8+ years of experience in a similar role
- Experience with AutoCAD, Synchro, HCS, MS Word and MS Excel

PREFERRED QUALIFICATIONS

- PA PE
- PTOE Certification
- PennDOT Project Experience

Please note that based on applicants, candidates with less experience may still be considered.

BENEFITS

LIVIC Civil offers excellent benefits including competitive salary, health insurance, short- and long-term disability, 401(k) plan, paid time off and holidays, the opportunity for growth and advancement, and an awesome group of people to work with.

EDUCATION

- Bachelor's (Preferred)
- Associate's

LOCATION

- Bloomsburg, PA
- Selinsgrove, PA
