Intelligence Analyst Training

Aim

The aim of this course is to provide the attendee with the necessary skills and learning to effectively perform the function of an Intelligence Analyst within multiple operational environments. It will practically demonstrate the analysis of differing forms of data, information and intelligence that will ultimately lead to effective operational and organisational decision making.

Learning Objectives

On completion of the course, attendees will be able to:

• Describe the intelligence process and the role of the analyst within this process.
• Identify, use and apply structured analytical techniques to enable decision making around operational and organisational issues.
• Produce analytical products that provide insight into the data they have at their disposal.
• Use critical thinking techniques to develop and test inferences and identify threat, risk and vulnerability.
• Visually display and disseminate the results of their analysis.
• Provide effective assessment for tactical, operational and strategic planning and direction.
• Explain current legislation that impacts upon the analytical function and demonstrate the use of analytical products within the evidential arena.

Duration

10 days

Target Audience

This course is aimed at new or existing Analysts within law enforcement, government or other public sector organisations operating within the UK or internationally.

Certification

All of our courses have been accredited under the Continuous Professional Development (CPD) Standards. CPD is the holistic commitment of professionals towards the enhancement of personal skills and proficiency throughout their careers.

Engaging in Continuing Professional Development ensures that both academic and practical qualifications do not become out-dated or obsolete; allowing individuals to continually 'up skill' and remain at the forefront of technology to ensure efficient and effective policing.
