

Introduction to Communications Data Training

Aim

The aim of this course is to provide a comprehensive overview of communications data, from its acquisition through to its use in aiding investigations and enhancing operational decision making.

Learning Objectives

On completion of the course, attendees will be able to:

- Define the processes and legislation that underpin the acquisition and use of communications data.
- Explain the impact of the Investigatory Powers Act (2016).
- Explain the types of data available under existing legislation and how that data can be successfully utilised within investigations.
- Describe mobile phone network features and identify data acquisition opportunities for use in investigations.
- Outline network features and data acquisition opportunities in relation to IP networks and WiFi providers.
- Interpret current data sets from different communications service providers and apply that interpretation to help make informed decisions.
- Highlight the critical role data plays in evidence and the importance of evidential attribution in a case.

Duration

2 days

Target Audience

Designed for Analysts, Researchers and Investigators who are working with or expected to work with communications data within an operational environment.

Certification

All of our courses have been accredited under the Continuous Professional Development (CPD) Standards. CPD is the holistic commitment of professionals towards the enhancement of personal skills and proficiency throughout their careers.

Engaging in Continuing Professional Development ensures that both academic and practical qualifications do not become out-dated or obsolete; allowing individuals to continually 'up skill' and remain at the forefront of technology to ensure efficient and effective policing.
