Make your business agile - **mobile and cloud connectivity**

Technology is fast evolving, offering you new opportunities for smarter ways of working through mobile or cloud-based services. To maximise their benefits to your business, Canon has a broad range of connectivity solutions to optimise your capture and output processes.

Keep productive on the move

Today, smart phones and tablets are widely used to keep mobile professionals connected and working efficiently on the move. However “52% who use smartphones for work said they can’t currently print from their device” Not being able to print from and scan to mobiles and tablets doesn’t have to be a drain on your productivity; Canon’s imageRUNNER ADVANCE multifunctional range is mobile-ready. A range of mobile solutions are available to suit the varied needs of businesses of all sizes.

Paper and cloud workflow integration

Cloud-based solutions and services offer fantastic new opportunities to make information and powerful services accessible anywhere. Businesses around the world are embracing cloud-based solutions but how do these integrate with paper-based workflows? Thankfully, Canon’s imageRUNNER ADVANCE range offers scalable solutions to seamlessly integrate your cloud-based workflows with your paper-based ones.

Access powerful document storage, conversion & management capabilities

Whether you are using popular applications such as Google Drive, DropBox and Evernote or powerful cloud-based workflow solutions for document management or conversion, imageRUNNER ADVANCE can seamlessly integrate to deliver efficient capture and output to ensure that you get the maximum benefit from your cloud-based solution.

52% who use smartphones for work said they can’t currently print from their device, but want to.

IDC Hardcopy Device Usage - Effect of Mobility On Print, March 2011

Question:

How mobile and productive is your workforce?

imageRUNNER ADVANCE ADVANTAGE

At heart of imageRUNNER ADVANCE is our unique and powerful MEAP and MEAP Web platforms. Together, these versatile platforms have allowed Canon and our partners to develop a wide range of solutions from device to cloud or server-based to keep your workforce mobile and improve information sharing. From simple solutions for small businesses to platform solutions for large enterprises- Canon has the right solution to keep your business agile.

* Basic iR-ADV functionality

imageRUNNER ADVANCE Mobile and Cloud Solution Range

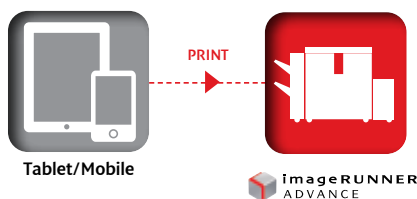

Canon Mobile Printing

Mobile Printing

Canon Mobile Printing makes imageRUNNER ADVANCE devices mobile-ready and provides basic mobile printing from iPhone and iPad. Users can print PDFs, images and webpages over the network. This simple server-less application is perfect for smaller businesses.

* Available December 2012 from the Apple App Store™

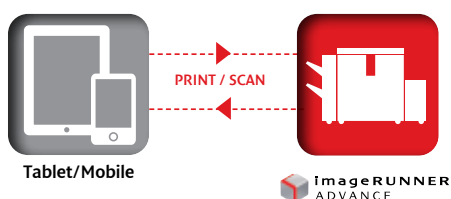

mobile PRINT & SCAN

mobile PRINT & SCAN

In addition to basic printing of PDFs and images, mobile PRINT & SCAN allows users can scan directly to tablets and mobiles*. This simple server-less solution is ideal for small to medium-sized businesses that also require scan functionality or greater control through integration with user-based accounting or authentication solutions.

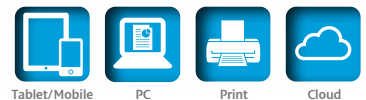

* iPhone, iPad and Android tablets and mobiles. Android support will be available from December 2012

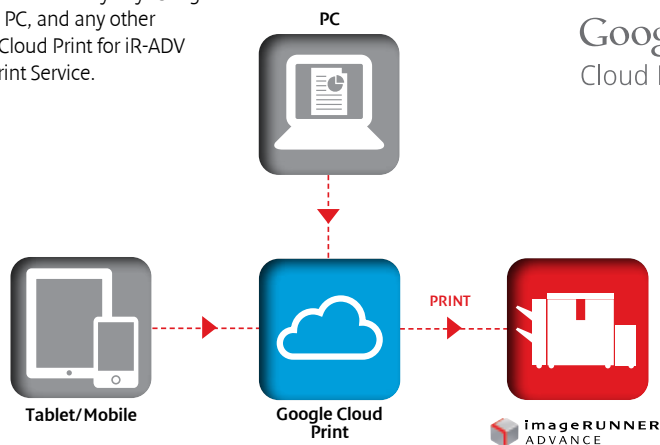

Question:

How agile is your business?
Do your mobile, cloud and paper-based workflows work together?

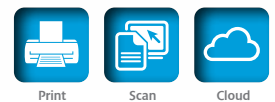

Google Cloud Print for iR-ADV

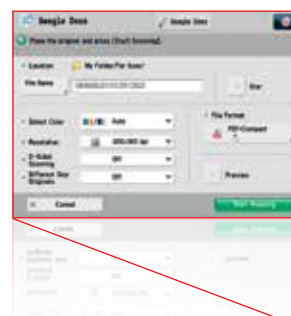

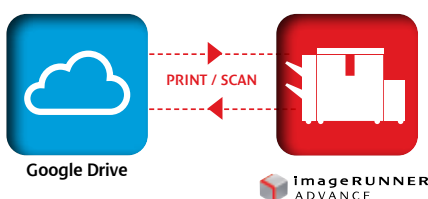

Print anywhere. Using Google Cloud Print, you can make your printers available to you and anyone you choose, from the applications you use every day. Google Cloud Print works on your phone, tablet, Chromebook, PC, and any other web-connected device you want to print from. Google Cloud Print for iR-ADV application provides integration with Google's Cloud Print Service.

Cloud Connect for iR-ADV

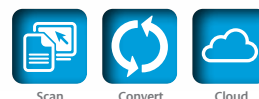

With Cloud Connect for iR-ADV, users can print documents from Google Drive as well as scan to Google Drive directly from an imageRUNNER ADVANCE device - all without a laptop or PC. Users need only fill in the login credentials, and documents can be accessed from any imageRUNNER ADVANCE connected to the internet. Cloud Connect for iR-ADV is a server-less solution that is perfect for businesses of all sizes that use Google Drive in their office. For example, this solution could be perfect for simple electronic form storage and distribution.

imageRUNNER ADVANCE Mobile and Cloud Solution Range

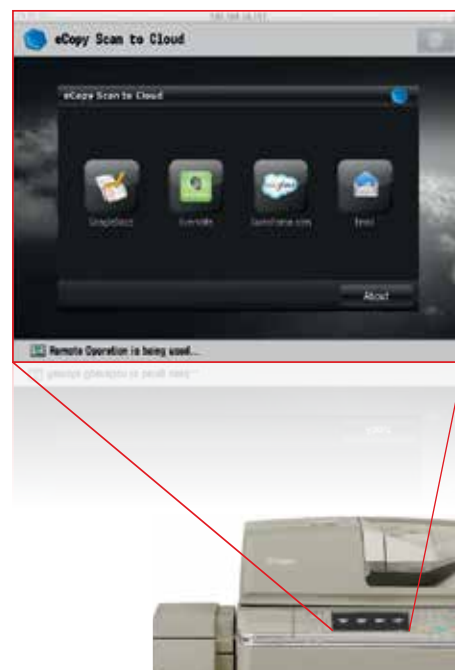

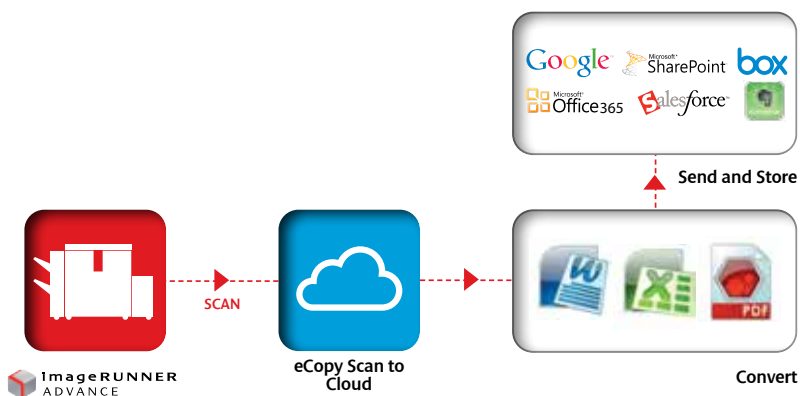

eCopy Scan to Cloud

eCopy Scan to Cloud adds immediate value to business customers who already use services such as Google Docs, SharePoint 365, and Salesforce.com. eCopy Scan to Cloud for imageRUNNER ADVANCE devices allows customers to scan directly to these services whilst converting standard PDF documents to searchable PDF, Excel and Word using the OmniPage cloud server.

The application resides in the device and in the Cloud, negating the requirement for any on premises server software. The growing list of cloud connectors includes; Google Docs, Evernote, Salesforce.com, PaperPort Anywhere, Exchange 365, SharePoint 365, Dropbox and E-mail (via SMTP).

For more information, please contact your sales representative.

63% of business leaders believe Cloud can make the entire organisation more 'business agile' and 'responsive.'

(IDC)

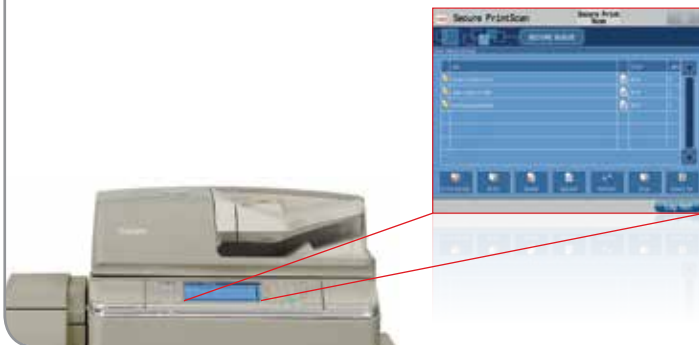

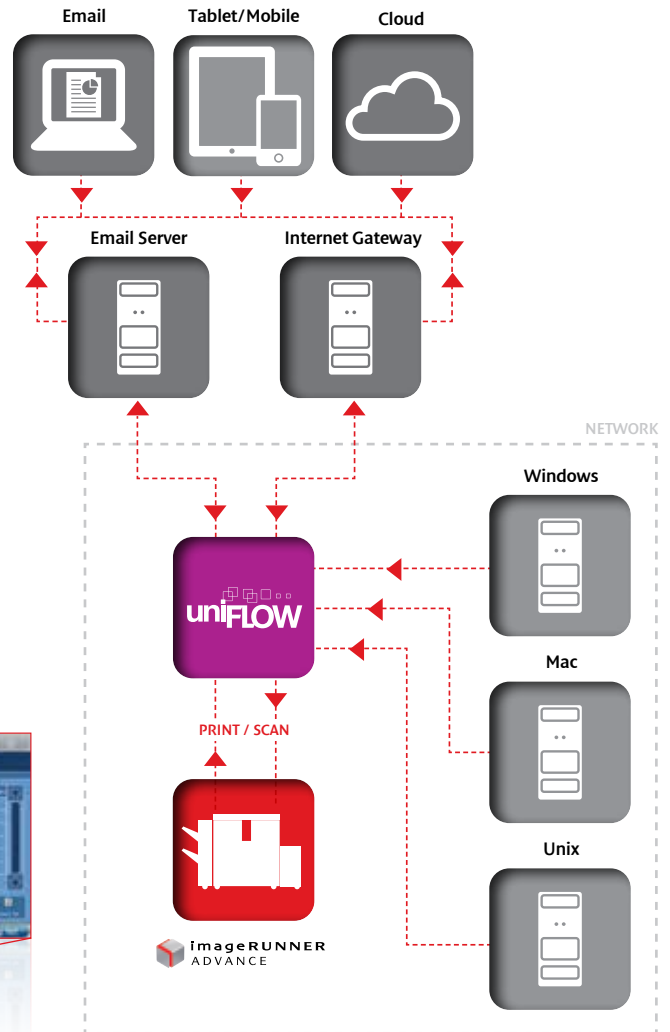

uniFLOW

uniFLOW is a powerful output and capture platform that is scalable for enterprises of all sizes.

- Provides one central platform for all PC-based and mobile print requirements offering organisations of all sizes the ability to cost-effectively and securely link mobile workers, contractors and even visitors to their print network
- Provides businesses with flexibility, scalability and complete control over mobile printing across their organisation
- Supports all internet enabled mobile devices and enables jobs to be printed to any output device
- Allows the conversion of email attachments, with over 300 file formats supported
- Delivers potential revenue-making opportunities for organisations looking to charge for mobile printing on site (e.g., universities and hotels)
- One touch configurable scan and capture workflows to almost any destination, including Google Drive
- uniFLOW MEAP application for imageRUNNER ADVANCE offers tight integration with uniFLOW allowing mobile users to change print options at the device as well as provide organisations with complete control of who is printing to which device.

For more information, please refer to the uniFLOW brochure or contact your sales representative.

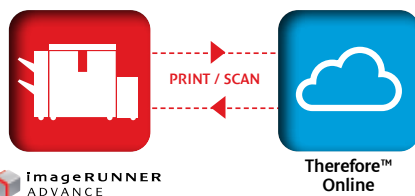

Therefore™ Online MFP Connector

Therefore™ Online is a comprehensive Document Management solution that enables the entire organisation to Capture, Store, Search, Retrieve, Collaborate, Manage, and Distribute with ease.

The Therefore™ MFP MEAP application for imageRUNNER ADVANCE makes sure that important information such as indexing is set by the user at the point of scanning. Ultimately, this ensures your information is organised and stored in a logic manner and can be searched for and retrieved easy.

For more information, please refer to the Therefore brochure or contact your sales representative.

Specifications
