This Lean Six Sigma program will provide training in these improvement methodologies from Mining Engineers using real data and case studies from operating mines. Attendees will gain improved analytical skills to find technical solutions to problems, as well as the people skills required to ensure the change is accepted and the improvement is sustainable and provide real value for your operation as soon as they return to site.
Register Now For An Upcoming Business Improvement Training Event

TORONTO, ONTARIO - CANADA

**Week 1** - September 16th - 20th

**Week 2** - October 28th - November 1st

This is a 10-day course comprised of two 5-day sessions. The trainees have a chance to apply learnings from the first week on site before returning for week 2.

**LEAN & SIX SIGMA GREEN BELT TRAINING**

The Lean and Six Sigma Green Belt training program is designed to give trainees all of the skills required to be an effective business improvement practitioner and realize production gains and cost savings through execution of business improvement projects.

Trainees apply these skills as they work through improvement projects completed as they progress. This allows the candidate to apply the learnings from the training and cement knowledge through practice while delivering immediate value to the organization.

---
