

DRIVEN BY AIR.

Air Connector

Once the connector is on,
it stays on!

After 40 years of fantastic service PCL will say good bye to the most robust reliable CO2 single clip on connector in their range.

The new and improved Air Connector has been designed to enhance and bring the PCL connector range into the 21st century.

Through extensive in-house and external testing, the new Air Connector has been proven to be as robust and reliable as ever.

Alloy/steel wheels have got bigger with intricate designs making the valves more difficult to reach with the human hand. The new range now consists of standard straight as well as 90-degree connectors for those difficult to reach valves, with both hose tail fitting and female threaded versions available.

Manufactured using the finest zinc alloy, aluminium and brass, the Air Connector boasts a vice like grip and easy operation with a simple but effective thumb push button which quickly releases the tyre valve, reducing non-value added time.
