

01. Summary Sheet

Rapid Project Planning Pack For The Research Phase

"If I had an hour to solve a problem I'd spend 55 minutes thinking about the problem and 5 minutes thinking about solutions" – Albert Einstein

The #1 Project Problem

#1 Problem: Projects going over time and over budget.

On a daily basis, we see people moving projects into the design phase **before** the research is started. This is like a doctor starting surgery without a thorough diagnosis or trying to build a house on a bad foundation.

That is why we created the **Rapid Project Planning Pack**. Now, you have a simple process to help you move through the **Research Phase**.

If you follow this tool, you will reduce project risk and improve project design.

- **01. RP3 Summary Sheet**

Once you have ticked all the boxes below, you are ready to move to the **Analysis Phase**

- **02. Building Project Roadmap**

Review the roadmap and identify where you are on your journey

- **03. Building Experts Directory**

Directory of professionals who can help you at each stage of your design and building process

- **04. Building Cost Estimator**

Simple do-it-yourself worksheet to estimate your building project

- **05. FAQs & SAQs**

Frequently-asked questions and should-ask questions you need to know about working with an Architectural Practice

- **06. Myth & Reality**

Some things Architectural Practices do outside design to complete a project

- **07. How To Create A Design Brief Using Only 7 Questions**

Contact your shortlisted Architectural Practices to start your process

- **08. Readiness Slider**

Gauge of how ready you are to move to the **Design Phase**

02. Building Project Roadmap

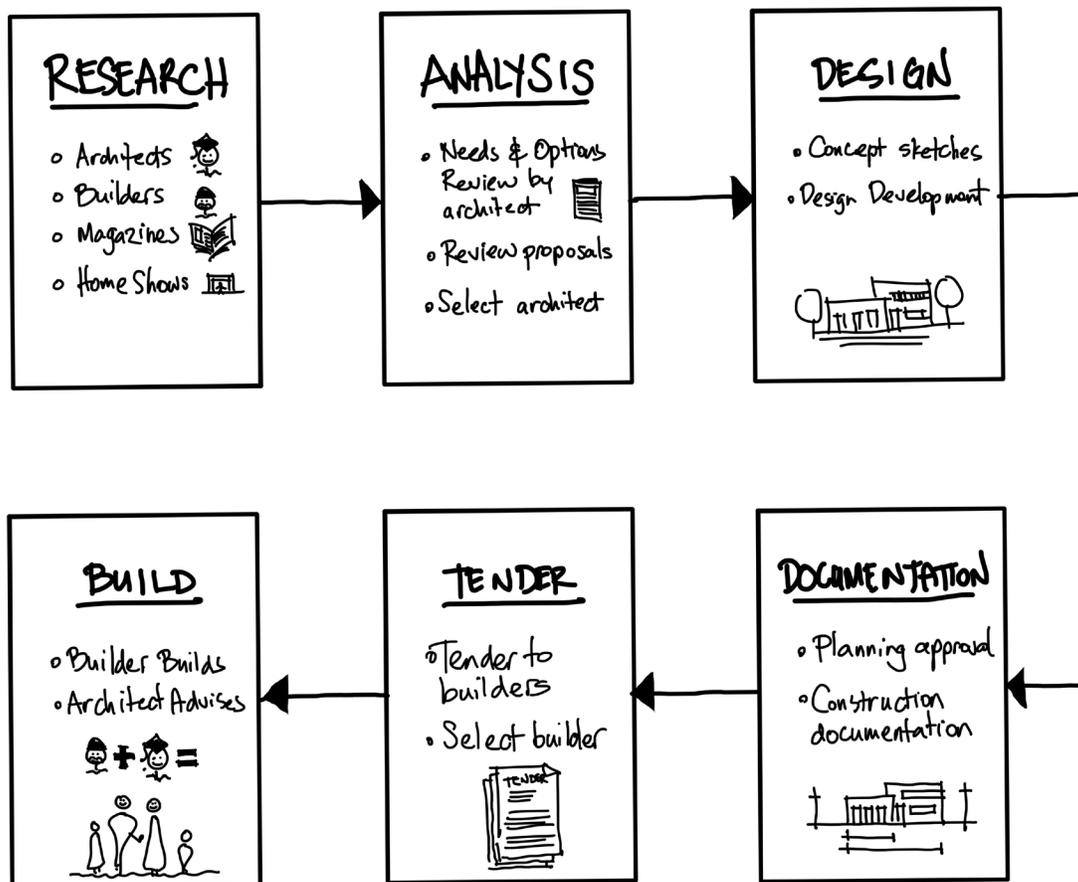

Major Steps Required For Designing and Building Your New Home

The Roadmap

This is important ... please read carefully.

Right now, you should be in the **Research Phase**. This is where you are gathering information and playing around with ideas. At the point you want to get serious, you will want to check the feasibility of your ideas and understand what the project constraints are. If you work with me, we will move to the **Analysis**

Phase by conducting a Needs and Options Review to eliminate assumptions, identify constraints and find your best options. You will receive a document that can be used by me or any other Architectural Practice that will ensure you reduce project risk and get the best options for your site and budget.

When you are ready to review the feasibility of your project, email or call us >>

03. Building Cost Estimator

The Simple, Do-It-Yourself Way To Estimate Your Number

The #1 Question ...

The most dreaded question Architectural Practices, builders and every other professional hates has got to be, **'how much will my project cost'?**

There are so many variables that a definitive answer is literally impossible.

Even worse, the consequences of trying to answer and risk giving 'bad advice' will have most experts running away to avoid the question.

The problem is that this question is VERY important. No one can proceed if they don't have a ball-park estimation of cost.

This guide will help you to determine an estimate of overall project costs. Your actual number may be more or less, but it can be helpful to see an estimated figure.

New Home Cost Estimator				Estimate Your Cost	
Style	Standard	Medium	Luxury	Area	Cost
Cost Per Sq M	£1200	£1500	£2000		
100	£120,000	£150,000	£200,000		
200	£240,000	£300,000	£400,000		
300	£360,000	£450,000	£600,000		

Renovation Cost Estimator				Estimate Your Cost	
Style	Standard	Medium	Luxury	Area	Cost
Cost Per Sq M	£1500	£1750	£2250		
30	£45,000	£52,500	£67,500		
50	£75,000	£87,500	£112,500		
60	£90,000	£105,000	£135,000

04. Questions To Ask

When Hiring an Architectural Practice, It's Helpful To Have A Process To Make Sure You Get The BEST Person For The Project.

Asking The Right Questions

Although extensive schooling and training are required for all Architectural Practices, that doesn't mean all Architectural Practices are created equal.

Finding the RIGHT Architectural Practice for you depends on several factors, including: personality, design style, building for taste or to

make money, budget and even whether your project requires a specialist skill set.

Choosing the right Architectural Practice can mean the difference between an enjoyable experience and one plagued with problems and hassles the whole way through once a project moves into the **Build Phase**. How will your project go?

The questions are the answer ...

A great Architectural Practice is your Designer, Advocate, Teacher, Project Leader and Coordinator

<input type="checkbox"/> What unique value do you have for our specific type of project?	<input type="checkbox"/> How would you like me to share my ideas, images, needs, wants and research?
<input type="checkbox"/> How can you add value to our home so that we maximize the return on investment when/if we sell?	<input type="checkbox"/> What can I do to help you deliver the best work for us?
<input type="checkbox"/> Do you offer a pre-design analysis service to help move us safely and efficiently towards the design phase?	<input type="checkbox"/> Do you have a team game plan that outlines how we will all successfully work together, even under pressure?
<input type="checkbox"/> What are the specific challenges for our type of project and how have you overcome these in the past?	<input type="checkbox"/> Will you run the tender process to find and select the best construction team?
<input type="checkbox"/> If my budget, timeline and scope of project are unrealistic, will you let me know?	<input type="checkbox"/> What educational material do you provide so we can understand the requirements of our specific type of project?

Hiring the RIGHT Architectural Practice is the single most important decision to make on your project.

05. Myth vs. Reality

What Do Architectural Practices Actually Do?

An Architectural Practices' role is a lot larger than most people realize. When an Architectural Practice manages your project, they ensure that every part of the process below (and more) is

Myth

Sketches design that a builder uses.

handled to ensure that the biggest investment in your life or career is safe and secure.

Reality

Checking the title and, in particular, any easements and land covenants that may restrict what or where you can build.

Ensuring Compliance with building and safety regulations, local planning regulations and restrictions. Depending on the project, there may be laws surrounding the preservation of the local environment or any historic parts of a building.

Leadership - heading up the team of professionals who will work on this stage of the project including builders, tradespeople, engineers, designers and financial professionals.

Construction documentation - translates the design into instructions and technical specifications for contractors and construction experts. Ensures those specifications are met.

Project management - site visits and meetings, overseeing the construction and validating quality of work, negotiating with contractors and dealing with and resolving any problems that arise.

In summary, the Architectural Practice is the conductor of the project orchestra.

06. How To Create A Design Brief Using Only 7 Questions

“Focusing is About Saying No.” - Steve Jobs

Alice: "Would you tell me, please, which way I ought to go from here?"

The Cheshire Cat: "That depends a good deal on where you want to go."

Alice: "I don't much care where."

The Cheshire Cat: "Then it doesn't much matter which way you go."

The method below is our famous 7 Question design brief creator. You can request a more detailed, but equally simple, guide by visiting www.staac.co.uk

Your Question	Answer
1 Outline your current situation?	
2 How do you live? Is that changing or about to change?	
3 What will you need to see to know your project has been a dramatic success?	
4 How do you want to FEEL as you move through your new space?	
5 Who are the important people this home needs to be designed for?	
6 What are the budget, timeframes and boundaries we need to work within?	
7 What does your home really mean to you?

07. Readiness Slider

Are You Ready To Move To The Design Phase?

Do You Need An Architectural Practice?

This exercise allows you to assess how ready you are to move to the **Design Phase**. If you are not close to 10 on ALL scales, then it's best to seek help from an expert to do this research.

If you rush into the design phase without this information available, you'll run the risk of making too many assumptions, which is the # 1 reason projects go over budget and over time.

"Measure twice, cut once," Builders Mantra

Question	Slider (0-10, zero = low, 10 = high)
On a 1-10 scale, how clear are you on exactly what you need?	<input type="range" value="0"/>
On a 1-10 scale, how aware are you of all the various options your site will accommodate?	<input type="range" value="0"/>
On a 1-10 scale, how confident are you that you are aware of all the legal requirements?	<input type="range" value="0"/>
On a 1-10 scale, how aware are you of the process you will need to have in place to get the project completed on time and on budget?	<input type="range" value="0"/>
On a 1-10 scale, how confident are you that you that your budget will achieve your needs?	<input type="range" value="0"/>
Give yourself a current overall rating for readiness.	<input type="range" value="0"/>

Don't worry if you are not at 10 on all scales yet. The Needs and Options Review process allows you to fill in the knowledge gaps and gets you ready to move to the **Design Phase**.

Our Needs and Options Review is the process designed to get you to 10 on ALL sliders above.
